*Monte Cassino in the Middle Ages* Herbert Bloch, 1986 The monastery of Monte Cassino founded by St Benedict in the sixth century was the cradle of Western monasticism It became one of the vital centers of culture and learning in Europe At the height of its influence in the eleventh and early twelfth centuries two of its abbots including Desiderius and one of its monks became popes and it controlled a vast network of dependencies churches monasteries villages and farms especially in central and southern Italy Herbert Bloch s study the product of forty years of research takes as its starting point the twelfth century bronze doors of the basilica of the abbey the most significant relic of the medieval structure The panels of these doors are inscribed with a list of more than 180 of the abbey s possessions Mr Bloch has supplemented this roster with lists found in papal and imperial privileges and other documents The heart of the book is a detailed investigation of the nearly 700 dependencies of Monte Cassino from the sixth to the twelfth century and beyond No comparable study of this or any other great medieval institution has ever before been undertaken Ironically it was the bombing of 1944 which destroyed the monastery that led to an unexpected revelation the discovery on the reverse side of some panels of the doors of magnificent engraved figures of patriarchs and apostles These proved to be remnants of the church portal ordered from Constantinople by Desiderius in the eleventh century which marked the beginning of the grandiose reconstruction of the abbey and its church the latter to become a model for many other churches In order to solve the riddle of the doors of Monte Cassino Bloch has investigated other bronze doors of Byzantine origin in Italy and the doors of the great Italian master Oderisius of Benevento as well as those of S Clemente a Casauria and of the cathedral of Benevento Also included is a study of the political and cultural impact of Byzantium on Monte Cassino and a chapter on Constantinus Africanus Saracen turned monk one of the most interesting figures in the history of medieval medicine The text is sumptuously illustrated with 193 plates most of the more than 300 illustrations have never before been published This three volume work with its nine detailed indexes offers a wealth of information for scholars in many different fields

Secular canons in Medieval Europe Sigrun Høgetveit Berg,Arnold Otto,2023-04-03 While both regular canons and monasticism with its development into different orders have reached a roughly even level of coverage in research the history of secular canons is a field which has hitherto been far less in focus of historian scholarship This might be due to the fact that they did not form orders or congregations offering a systematic approach to their institutions Hence the pieces of research carried out so far mostly deal with a single cathedral or collegiate chapter and do not expand on the phenomenon in general Likewise the present publication may not give a comprehensive survey but yet takes a comparative approach by regarding the establishment of secular canons in a European longitudinal section from the Polar Circle to Southern Italy In this course both cathedral and collegiate chapters in Scandinavian German Polish and Italian territories and the respective career paths canons took into them will be considered In this course the essays take only some brief recourses to the early middle ages when canons maintained a cloistered vita communis but rather turn their view to those centuries in the high and later middle ages up to reformation times when the chapters reached their full implementation The essays collected in this volume base on a session series held at the International Medieval Congress 2018 in Leeds The contributors are renowned historians in this field Antonio Antonetti Caserta Anna
