Introduction French Battleships 1922-1956 John Jordan, Robert Dumas, 2009-09-17 The battleships of the Dunkerque and Richelieu classes were the most radical and influential designs of the interwar period and were coveted by the British the Germans and the Italians following the Armistice of June 1940 After an extensive refit in the USA Richelieu went on to serve alongside the Royal Navy during 1943 45 Using a wealth of primary source material some of which has only recently been made available John Jordan and Robert Dumas have embarked on a completely new study of these important and technically interesting ships A full account of their development is followed by a detailed analysis of their design characteristics profusely illustrated by inboard profiles and schematic drawings The technical chapters are interspersed with operational histories of the ships with a particular focus on the operations in which they engaged other heavy units Mers el Kebir Dakar and Casablanca These accounts include a detailed analysis of their performance in action and the damage sustained and are supported by specially drawn maps and by the logs of Strasbourg and Richelieu Twenty two colour profile and plan views illustrate the ships appearance at the various stages of their careers **French Warships in the Age of Steam**

1859-1914 Stephen S. Roberts, 2023-01-04 This outstanding book will be essential for future studies of naval policy in the period between la Gloire and the Great War The Naval Review This book is the first comprehensive listing in English of more than 1400 warships that were added to the official French navy fleet list between 1 January 1859 and World War I It includes everything from the largest battleships to a small armoured gunboat that looked like a floating egg Reflecting the main phases of naval policy the ships are listed in three separate parts to keep contemporary designs together and then by ship type and class For each class the book provides a design history explaining why the ships were built substantial technical characteristics for the ships as completed and after major reconstructions and selected career milestones including the ultimate fate of each ship Following the earlier volumes written jointly with Rif Winfield French Warships in the Age of Sail

1626 1786 and French Warships in the Age of Sail 1786 1861 this trilogy now provides a complete picture of the development of French warships over a period of almost three centuries As a technical reference on the French ships of 1859 to 1914 this book is a must for the serious naval architecture student modeler or enthusiast So much solid information is packed in this book arranged logically clearly and with so many illustrations I cannot see where another volume on this subject can compete Highly recommended Nautical Research Journal Superlatives abound in describing this book arguably the finest naval shiplist ever created Warship International *A Complete Collection of the Treaties and Conventions, and Reciprocal Regulations at Present Subsisting Between Great Britain and Foreign Powers ...* Great Britain, Lewis Hertslet, 1859
