Flavia Journal Reflections:

The "Write" Way Mathematics Journal Prompts & More, Geometry ,2006 **An Introduction to the International Criminal Court** William A. Schabas,2020-07-02 This is the authoritative introduction to the International Criminal Court fully updated in this sixth edition The book covers the legal framework of the Court the cases that it has heard and that are still to come and the political debates surrounding its operation It is written by one of the major authorities on the subject in language accessible to non specialists The sixth edition brings legal references fully up to date in light of the Court s case law Several trials have now been completed with four convictions and a number of controversial acquittals The book also discusses the situations that the Court is currently investigating including Palestine Georgia Ukraine Venezuela and the UK in Iraq It also looks into the crisis with African states and the hostility of the United States to the institution *Sex, Law, and the Politics of Age* Ishita Pande,2020-07-16 Ishita Pande s innovative study provides a dual biography of India s path breaking Child Marriage Restraint Act 1929 and of age itself as a key category of identity for upholding the rule of law and for governing intimate life in late colonial India Through a reading of legislative assembly debates legal cases government reports propaganda literature Hindi novels and sexological tracts Pande tells a wide ranging story about the importance of debates over child protection to India s coming of age By tracing the history of age in colonial India she illuminates the role of law in sculpting modern subjects demonstrating how seemingly natural age based exclusions and understandings of legal minority became the alibi for other political exclusions and the minoritization of entire communities in colonial India In doing so Pande highlights how childhood as a political category was fundamental not just to ideas of sexual norms and domestic life but also to the conceptualisation of citizenship and India as a nation in this formative period *Chambers's Journal* ,1898

Learner and Teacher Autonomy Terry Lamb,Hayo Reinders,2008-02-06 This edited volume offers a cohesive account of recent developments across the world in the field of learner and teacher autonomy in languages education Drawing on the work of eminent researchers of language learning and teaching it explores at both conceptual and practical levels issues related to current pedagogical developments in a wide range of contexts Global shifts have led to an increase in autonomous and independent learning both in policy and practice including self access and distance learning The book s scope and focus will therefore be beneficial to language teachers as well as to students and researchers in applied linguistics and those involved in pre and in service teacher education The book concludes with an overview of the state of research in this field focusing on the inter relationships between the concepts of learner and teacher autonomy **Struggling for Autonomy in Language Education** Flávia Vieira,2009 Pedagogy for autonomy is a continuous struggle for transformative and empowering education That struggle entails reflecting on what fosters or hinders teacher and learner development acting towards challenging and reshaping oppressive forces and circumstances and being willing to deal with complexity uncertainty and risk taking without losing one s hopes and ideals Our main purpose is to present and discuss ways in which

critical reflecting acting and being emerge in contexts of teaching and or teacher education not as realisations of a grand theory of pedagogy for autonomy but rather as local idiosyncratic struggles to grasp and enhance the meanings that autonomy may not take in diverse educational settings Although from different angles the chapters highlight the central role of teacher and learner development as interrelated aspects of pedagogy for autonomy in language education

Enhancing Autonomy in Language Education Manuel Jiménez Raya, Flávia Vieira, 2015-04-24 The book explores the idea that pedagogy for autonomy requires the integration of teacher and learner development and can be enhanced through a case based approach in teacher education A case based approach values experiential professional learning and expands professional competences necessary to promote autonomy in schools developing a critical view of language education managing local constraints so as to open up spaces for manoeuvre centring teaching on learning interacting with others in the professional community Two strategies to implement the approach are presented and illustrated The first one involves teachers in designing implementing and evaluating experiences of pedagogy for autonomy which are the basis for writing professional narratives and building a case portfolio The second draws on teachers pedagogical experience as the basis for the construction of case materials where experiential elements are combined with theoretical input and reflective tasks so that the teachers who use those materials can reflect about and explore their own practice

Collecting and Conserving Net Art Annet Dekker, 2018-05-08 Collecting and Conserving Net Art explores the qualities and characteristics of net art and its influence on conservation practices By addressing and answering some of the challenges facing net art and providing an exploration of its intersection with conservation the book casts a new light on net art conservation curating and museum studies Viewing net art as a process rather than as a fixed object the book considers how this is influenced by and executed through other systems and users Arguing that these processes and networks are imbued with ambiguity the book suggests that this is strategically used to create suspense obfuscate existing systems and disrupt power structures The rapid obsolescence of hard and software the existence of many net artworks within restricted platforms and the fact that artworks often act as assemblages that change or mutate make net art a challenging case for conservation Taking the performative and interpretive roles conservators play into account the book demonstrates how practitioners can make more informed decisions when responding to critically analysing or working with net art particularly software based processes Collecting and Conserving Net Art is intended for researchers academics and postgraduate students especially those engaged in the study of museum studies conservation and heritage studies curatorial studies digital art and art history The book should also be interesting to professionals who are involved in the conservation and curation of digital arts performance media and software

Democratization in Africa: Challenges and Prospects Gordon Crawford, Gabrielle Lynch, 2013-09-13 It is two decades since the third wave of democratization began to roll across sub Saharan Africa in the early 1990s This book provides a very timely investigation into the progress and setbacks over that period the challenges that remain and the

prospects for future democratization in Africa It commences with an overall assessment of the lack of progress made from 1990 to 2010 exploring positive developments with reasons for caution Based on original research subsequent contributions examine various themes through country case studies inclusive of the routinisation of elections accompanied by democratic rollback and the rise of hybrid regimes the tenacity of presidential powers the dilemmas of power sharing ethnic voting and rise of a violent politics of belonging the role of donors and the ambiguities of democracy promotion Overall the book concludes that steps forward remain greater than reversals and that typically though not universally sub Saharan African countries are more democratic today than in the late 1980s Nonetheless the book also calls for more meaningful processes of democratization that aim not only at securing civil and political rights but also socio economic rights and the physical security of African citizens This book was originally published as a special issue of Democratization Social Innovation and Sustainability Transition Geoff Desa,Xiangping Jia,2022-11-09 This book uses a historical and modern lens to reimagine the role that Extension could potentially play in catalyzing reciprocal co learning relationships between Land Grant Universities and their diverse local constituencies The establishment of statewide extension systems was once seen as a way to ensure that Land Grant Universities would be accessible and responsive to all of a state s residents Extension systems continue to offer a front door to a major public university in almost every county of the United States but they tend to be viewed primarily as a way to translate science or distribute information from the university to the public This books argues for the importance of Extension and shows that we are conceiving of this system too narrowly Only by retelling the stories of the Extension and getting people to see themselves as part of the story can we imagine a different future in which state universities and land grant colleges engage more authentically and equitably in two way relationships with their local constituents in catalyzing reciprocal co learning relationships between Land Grant Universities and their diverse local constituencies Chapter Palatable disruption the politics of plant milk chapter Feeding the melting pot inclusive strategies for the multi ethnic city chapter A carrot isn t a carrot isn t a carrot tracing value in alternative practices of food exchange chapter Virtualizing the good life reworking narratives of agrarianism and the rural idyll in a computer game and chapter Workable utopias for social change through inclusion and empowerment Community supported agriculture CSA in Wales as social innovation are available open access under a Creative Commons Attribution 4 0 International license via link [springer.com](https://www.springer.com) An Introduction to the International Criminal Court William Schabas,2007-10-18 The International Criminal Court ushers in a new era in the protection of human rights The Court will prosecute genocide crimes against humanity and war crimes when national justice systems are either unwilling or unable to do so themselves This third revised edition considers the initial rulings by the Pre Trial Chambers and the Appeals Chamber and the cases it is prosecuting namely Democratic Republic of Congo northern Uganda Darfur as well as those where it had decided not to proceed such as Iraq The law of the Court up to and including its ruling on a confirmation hearing committing Chalres Lubanga for trial on child soldiers offences

is covered It also addresses the difficulties created by US opposition analysing the ineffectiveness of measures taken by Washington to obstruct the Court and its increasing recognition of the inevitability of the institution The Crime of Aggression under the Rome Statute of the International Criminal Court Carrie McDougall,2021-08-12 After the crime of aggression was adopted under the Rome Statute of the International Criminal Court Carrie McDougall used her intimate involvement in the crime s negotiations combined with extensive scholarly reflection to produce the first and most comprehensive academic study This updated second edition offers an exhaustive and sophisticated legal analysis of the crime s definition as well as the provisions governing the ICC s exercise of jurisdiction over the crime It explores the desirability of holding individuals to account for unlawful uses of inter State armed force the geo political significance of the crime and a range of practical issues likely to arise in prosecutions before both the ICC and domestic courts This book is highly relevant to all academics and practitioners interested in the crime of aggression as well as broader issues relating to the prohibition of the use of force international criminal law and the ICC **Women in Archaeology** Sandra L. López Varela,2023-07-12 This book tells the story of women in archaeology worldwide and their dedication to advancing knowledge and human understanding In their own voices they present themselves as archaeologists working in academia or the private and public sector across 33 countries The chapters in this volume reconstruct the history of archaeology while honoring those female scholars and their pivotal research who are no longer with us Many scholars in this volume fiercely explore non traditional research areas in archaeology The chapters bear witness to their valuable and unique contributions to reconstructing the past through innovative theoretical and methodological approaches In doing so they share the inherent difficulties of practicing archaeology not only because they too are mothers sisters and wives but also because of the context in which they are writing This volume may interest researchers in archaeology history of science gender studies and feminist theory Chapter 11 is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com)

Governmentality in EU External Trade and Environment Policy Jessica Lawrence,2018-02-07 Governmentality and EU External Trade and Environment Policy applies theories drawn from Foucauldian governmentality studies to investigate the ideological and political roots of the European Union EU s external trade and environmental policy and their effects on the transnational legal landscape The EU s desire to spread environmental norms abroad is viewed in the book as a significant feature of contemporary EU trade policy The EU s activities in this area have not been uncontroversial for other transnational legal actors States individuals and organizations have challenged the EU s various trade and environment policies arguing that they are coercive unfair over reaching or inefficient Meanwhile these policies have also raised a number of questions from the perspective of legality and political theory This book considers what the practice of EU external trade and environment policy and international resistance to it tells us about the way the EU perceives the role and limits of transnational government the means and ends of politics and the drivers of human and institutional behavior Jessica

Lawrence examines the legal and political discourse of the EU and those affected by its policies By studying legal cases statements by officials legislative texts press releases and other representative documents the book identifies the rationalities technologies and subjectivities that underlie contemporary EU activity in this area The overall effect paints a more complicated and nuanced picture of the EU's vision of itself and its goals one that ultimately seeks to provide a better understanding of the functioning of power in this area International Criminal Tribunals and Domestic Accountability

Patryk I. Labuda, 2023-05-17 In the 1990s the promise of justice for atrocity crimes was associated with the revival of international criminal tribunals ICTs More recently however there has been a renewed emphasis on domestic accountability for international crimes across the globe In identifying a complementarity turn a paradigm shift toward domestic accountability in the field of international criminal justice this book investigates how the shadow of international criminal tribunals influences the treatment of serious crimes at the national level Drawing on research and interviews in Rwanda the Democratic Republic of Congo and Sierra Leone this book develops a tripartite framework to analyse how states and tribunals work with despite or against one another in the fight against impunity While international prosecutors and judges use the principle of complementarity to foster cooperation and decrease tension with government actors Patryk I Labuda argues that too much deference by ICTs toward states reduces the likelihood of accountability and may enable national elites to consolidate authoritarian power By interrogating how international accountability stakeholders relate to their domestic counterparts International Criminal Tribunals and Domestic Accountability advocates improvements to ICTs institutional design and more dynamic interactions with states to strengthen the enforcement of international criminal law

Conservative Party-Building in Latin America James Loxton, 2021-05-28 Where do strong conservative parties come from While there is a growing scholarly awareness about the importance of such parties for democratic stability much less is known about their origins In this groundbreaking book James Loxton takes up this question by examining new conservative parties formed in Latin America between 1978 and 2010 The most successful cases he finds shared a surprising characteristic they had deep roots in former dictatorships Through a comparative analysis of failed and successful cases in Argentina Chile El Salvador and Guatemala Loxton argues that this was not a coincidence The successes inherited a range of resources from outgoing authoritarian regimes that paradoxically gave them an advantage in democratic competition He also highlights the role of intense counterrevolutionary struggle as a source of party cohesion In addition to making an empirical contribution to the study of the Latin American right and a theoretical contribution to the study of party building Loxton advances our understanding of the worldwide phenomenon of authoritarian successor parties parties that emerge from authoritarian regimes but that operate after a transition to democracy A major work Conservative Party Building in Latin America will reshape our understanding of politics in contemporary Latin America and the realities of democratic transitions everywhere Transdisciplinarity Revealed Victoria Martin, 2017-04-17 An invaluable book on the emergent field of

transdisciplinarity that explains how it applies to library service and collections conceptually and identifies practical strategies for supporting transdisciplinary research conducted by faculty and students *Transdisciplinarity Revealed What Librarians Need to Know* supplies pragmatic advice for academic librarians on working with faculty and students to promote the skills necessary for successful transdisciplinary research It shows how to overcome the obstacles created by the ways that libraries have traditionally organized information in subject silos offering librarians conceptual and practical guidance on transdisciplinarity This information will enable them to support research that transcends disciplinary limits to help researchers answer the complex questions of our world today Part I provides an overview of the emergent field of transdisciplinarity that introduces readers to all key concepts and issues Part II explains how transdisciplinarity applies to library services and collections explores new strategies for supporting transdisciplinary research conducted by faculty and students and describes how librarians can better address the unique challenges of working in the transdisciplinary research environment Readers will come away with a full understanding of the distinctions between the four modes of knowledge production disciplinary multi disciplinary interdisciplinary and transdisciplinarity and apply this knowledge to benefit their patrons research efforts

Genocide in International Law William Schabas, 2000-08-31 The 1948 Genocide Convention has suddenly become a vital legal tool in the international campaign against impunity The succinct provisions of the Convention are now being interpreted in important judgements by the International Court of Justice the ad hoc Tribunals for the former Yugoslavia and Rwanda and a growing number of domestic courts In this definitive work William A Schabas focuses on the judicial interpretation of the Convention debates in the International Law Commission political statements in bodies like the General Assembly of the United Nations and the growing body of case law Detailed attention is given to the concept of protected groups to the quantitative dimension of genocide to problems of criminal prosecution including defenses and complicity and to issues of international judicial cooperations such as extradition He also explores the duty to prevent genocide and the consequences this may have on the emerging law of humanitarian intervention

Specialized Communication Thorsten Roelcke, Ruth Breeze, Jan Engberg, 2025-06-02 Specialized communication in science technology or institutions is one of the most important and exciting fields of applied linguistics The handbook captures the current and relevant knowledge of specialized languages and professional communication It promotes international communication on central issues where dialogue is urgently needed concerning both their intellectual underpinning and the day to day practices associated with them

Family Studies Anuja Agrawal, 2024-10-31 Within the social political and economic contexts existing in modern day India family is neither a simple remnant of tradition nor a domain merely representing insulated private lives Rather it is implicated in malleable yet overpowering structures relationships and practices If the family is a crucial site of ideological and imaginative investments playing a critical role in reproducing and defining contemporary selves and societies families are responsive to and constrained by the complex dynamics in which they are

enmeshed Family relationships remain fundamental to survival and security even as policy and legislative imperatives as well as reproductive and communication technologies play a crucial role in reshaping them Critically interrogating the extant approaches to and concepts within the study of family Family Studies brings together diverse contributions by scholars from varied backgrounds to focus upon issues central to the conceptualization of family and their implications for Indian society The chapters in this volume make a strong case for why family as an ideological construct and families as a multitude of lived relationships should continue to be subjects of critical social scientific attention
