Fluoridation The Great Dilemma:

Fluoridation George L. Waldbott, Albert W. Burgstahler, Henry Lewis McKinney, 1978 **The Fluoride Wars** R. Allan Freeze, Jay H. Lehr, 2009-04-20 A lively account of fluoridation and its discontents Since its first implementation in Grand Rapids Michigan in 1945 public drinking water fluoridation and its attendant conflicts controversies and conspiracy theories serve as an object lesson in American science public health and policymaking In addition to the arguments on the issue still raging today the tale of fluoridation and its discontents also resonates with such present concerns as genetically modified foods global warming response nuclear power and environmental regulation Offering the best current thinking on the issue The Fluoride Wars presents a witty and detailed social history of the fluoridation debate in America illuminating the intersection of science and politics in our recent past This reader friendly assessment explores the pro and anti fluoridation movements key players and important events Full of amusing and vivid anecdotes and examples this accessible recounting includes A careful and non condescending look at the hard science popular science pseudo science and junk science involved A look at fluoride issues including dosage cost financial and funding interests fluorosis and problems of risk cost benefit analysis The back and forth drama between pro and anti fluoridation factions with all its claims counterclaims insults acrimony and lawsuits Case studies of various cities and their experiences with municipal water fluoridation initiatives Fluorophobia and popular conspiracy theories involving fluoride The colorful characters in the debate including activists scientists magicians and politicians A richly and considerably told tale of American science and public life The Fluoride Wars offers an engrossing history to both interested general readers and specialists in public health dentistry policymaking and related fields **The Fluoride Deception** Christopher Bryson, 2011-01-04 With the narrative punch of Jonathan Harr's A Civil Action and the commitment to environmental truth telling of Erin Brockovich The Fluoride Deception documents a powerful connection between big corporations the U S military and the historic reassurances of fluoride safety provided by the nation's public health establishment The Fluoride Deception reads like a thriller but one supported by two hundred pages of source notes years of investigative reporting scores of scientist interviews and archival research in places such as the newly opened files of the Manhattan Project and the Atomic Energy Commission The book is nothing less than an exhumation of one of the great secret narratives of the industrial era how a grim workplace poison and the most damaging environmental pollutant of the cold war was added to our drinking water and toothpaste *The Case against Fluoride* Paul Connett, James Beck, Spedding Micklem, 2010-10-07 National Health Information Award At once painstakingly documented and also highly readable The Case Against Fluoride brings new research to light it explores the poor science bizarre tactics biased reviews and puzzling motivations of a relatively small number of influential people who continue to push this practice on a largely ill informed public American Academy of Environmental Medicine Newsletter When the U S Public Health Service endorsed water fluoridation in 1950 there was little evidence of its safety Now six decades later and after most countries have rejected

the practice more than 70 percent of Americans as well as 200 million people worldwide are drinking fluoridated water The Center for Disease Control and the American Dental Association continue to promote it and even mandatory statewide water fluoridation despite increasing evidence that it is not only unnecessary but potentially hazardous to human health In this timely and important book Dr Paul Connett Dr James Beck and Dr H Spedding Micklem take a new look at the science behind water fluoridation and argue that just because the dental and medical establishments endorse a public health measure doesn't mean it's safe In the case of water fluoridation the chemicals that go into the drinking water that more than 180 million people drink each day are not even pharmaceutical grade but rather a hazardous waste product of the phosphate fertilizer industry It is illegal to dump this waste into the sea or local surface water and yet it is allowed in our drinking water To make matters worse this program receives no oversight from the Food and Drug Administration and the Environmental Protection Agency takes no responsibility for the practice And from an ethical standpoint say the authors water fluoridation is a bad medical practice individuals are being forced to take medication without their informed consent there is no control over the dose and no monitoring of possible side effects Alfred North Whitehead said the scientific method means leaving options open for revision An ancient Roman adage says that whatever touches all must be approved by all These characterizations of science and democracy are the reasons for reading this book Especially if you and your family are drinking administratively mandated fluoridated water Ralph Nader
