Rowthorn,2013-04-12 This book provides new perspectives on recent Asian dynamism which go beyond the mainstream views by attempting to situate the recent economic expansion within a broader analysis of capitalist accumulation and the various processes that it generates both within and across economies The contributions in the book include analyses of recent growth patterns in both China and India assessments of the sustainability of such growth and potential constraints and pitfalls the role of international finance in affecting both national and international growth and employment patterns the factors determining particular accumulation strategies and the results of these strategies These forces within the two economies of China and India are situated within a broader assessment of the impacts on the world economy by identifying long run tendencies in international capitalism and changing patterns of uneven development Specific issues emerging within the Asian region are identified including not just the relations between the three large Asian economies but also the

wider geopolitical implications as well as the political economy of these changes This book therefore provides a more comprehensive examination of the longer run dynamics of the global capitalist system in which these economies are necessarily destined to play more significant roles in future *The Dynamics of Asian Economic Development* Hitoshi Hirakawa, Ferdinand C. Maquito, 2024-12-10 One feature of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework The development of emerging economies has caught the world's attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia This book clarifies such regional development structure by focusing on the direct investments of multinational firms and the importance of gradual changes of specific policies adopted by newly industrialized economies Moreover the book concretely deals with the US China trade war and China's Belt and Road Initiative BRI as a problem of Asian economies In so doing the book not only perceives the structural change of the global economy as a structural change from a US centric global economy of the twentieth century to a China centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China The investment initiative through China's BRI has prompted the investment competition between Japan and the US which has made even stronger the possibility of giving birth to a new economic frontier in Afro Eurasia Another feature is the consideration of various issues that confront Asian countries in their search for economic development using the Philippines as a case study The analysis of the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region At the same time this book studies the significance and new issues as a region of the economy and overseas policies of attention drawer China
