**Misadventures in the Humanities** Eugene Goodheart,2018-05-04 In recent decades the humanities have been in thrall to postmodern skepticism while Darwinists brimming with confidence in the genuine progress they have made in the sciences of biology and psychology have set their sights on rescuing the humanities from the ravages of postmodernism In this volume

Eugene Goodheart attacks the neo Darwinist approach to the arts and articulates a powerful defense of humanist criticism. E. O. Wilson, the distinguished Harvard biologist, has spoken of converting philosophy into science, substituting science for religion, and formulating a biological theory of literature and the arts in *Consilience: The Unity of Knowledge*. Goodheart demonstrates that Wilson's efforts and those of his colleagues Richard Dawkins, Steven Pinker, and Daniel Dennett, among others, have resulted in scientism rather than science. If, for example, Dawkins had contented himself in *The Selfish Gene* with the claim that Darwinism had made worthless other answers to the question of how we have evolved, he would have given offense only to creationists, but questions of meaning and purpose are of another order. Contemporary Darwinist critiques err in assuming that art and traditional criticism aspire to truths that can be codified in terms of scientific laws. If this were so, we would have to regard the speculations of Plato, Aristotle, Augustine, Montaigne, Shakespeare, and Rousseau as worthless. Goodheart exposes the philistinism of literary Darwinism, the bad faith and inverted fundamentalism of the Darwinian approach to religion, and the dangers of the effort to create a Darwinian ethical system. Taken together, Goodheart's arguments show that in moving beyond their area of competence, the neo Darwinists commit an ideology, not a science.

**The Blank Slate** Steven Pinker, 2003-08-26. A brilliant inquiry into the origins of human nature from the author of *Rationality: The Better Angels of Our Nature* and *Enlightenment Now*. Sweeping, erudite, sharply argued, and fun to read, also highly persuasive. Time Finalist for the Pulitzer Prize. Updated with a new afterword. One of the world's leading experts on language and the mind explores the idea of human nature and its moral, emotional, and political colorings. With characteristic wit, lucidity, and insight, Pinker argues that the dogma that the mind has no innate traits, a doctrine held by many intellectuals during the past century, denies our common humanity and our individual preferences, replaces objective analyses of social problems with feel-good slogans, and distorts our understanding of politics, violence, parenting, and the arts. Injecting calm and rationality into debates that are notorious for ax-grinding and mud-slinging, Pinker shows the importance of an honest acknowledgment of human nature based on science and common sense.

**The Wiley Handbook of Art Therapy** David E. Gussak, Marcia L. Rosal, 2016-01-19.
