on Health Dale B. Hahn,2003 Helping Today s Canadian Students Focus On Health Today s media oriented students are aware of the critical health issues of the new millennium They hear about environmental issues substance abuse sexually transmitted diseases fitness and nutrition virtually every day The value of the personal health course is its potential to expand students knowledge of these and other health topics Students will then be able to examine their attitudes toward health issues and modify their behaviour to improve their health and perhaps even prevent or delay the onset of certain health conditions Focus on Health First Canadian Edition has the currency coverage and pedagogy aimed at helping students to think critically about Health both their own and in general that instructors are looking for in this course This text s engaging style proactive features and interactive multimedia ancillaries all invite the diverse group of students in the undergraduate personal health course to make positive changes in their health behaviour Childhood Stress, Trauma and Synapse Loss Maxwell R Bennett,2024-07-13 This book is concerned with the extent to which childhood stress and trauma lead in relative maturity to major depression MDD and post traumatic stress disorder PTSD The loss of synapses in the cortex accompanying childhood maltreatment is identified as a principal mechanism for developing these disorders Considerable

attention is given to identifying interventions that will restore lost synapses so ameliorating these mental illnesses The book describes the emergence of abnormal psychology in youth and adult life following childhood maltreatment Of considerable immediate concern is the extent to which such maltreatment significantly enhances the tendency to suicide and suicidality Next consideration is given as to how personality disorders such as obsessive compulsive disorder the very dangerous borderline personality disorder and the publicly offensive narcissistic personality disorder arise from childhood maltreatment The classification or nosology of mental and personality disorders as well as the principal psychoanalytic approaches available for their treatment are sketched together with recent attempts to use novel constructs that bridge between symptoms based on patients behavior and self descriptions Recently new techniques have been developed for brain imaging and non invasive and localized brain stimulation These show that nodes of the distributed brain network whose malfunction is closely related to major depressive disorders are likely to differ in their importance from patient to patient Wonderfully so called closed loop stimulation techniques are now available for automatically adjusting the activity of individual nodes in individual patients relieving them of their major depression The results of our research and that of others using magnetic resonance imaging of mature patients that have been maltreated as children have been to identify the nodes that have lost gray matter We have shown that this is likely due to the loss of synapses in these nodes Finally the central question of how synapses may be restored in these nodes to ameliorate major depressive disorders post traumatic stress disorder and suicidality is considered emphasizing the recent revolutionary discovery that the psychedelic ketamine restores synapses and has a therapeutic effect on mental health

Something to Cry About Susan M. Turner, 2006-01-01 Why does our society think it is okay to hit children Almost everyone thinks it is wrong to abuse a child But many parents and teachers believe it is okay to spank children rap their knuckles slap their faces pull their hair and yank their arms as long as the punishment does not result in serious injury or death and is intended to improve a child s behaviour Susan M Turner explores the historical psychological sociological and legal foundations of this belief from a philosophical perspective and argues why it should be abandoned Something to Cry About presents evidence from recent studies showing that all forms of corporal punishment pose significant risks for children and that none improves behaviour in the long term Dr Turner also examines Section 43 of the Canadian Criminal Code a law that protects those who punish children in their care by allowing them to hit the children as long as such punishment is reasonable even though Canadian case law shows that reasonable has included breaking a child s fingers Turner presents a comprehensive argument in favour of repeal In Something to Cry About Turner takes a definite stand but does so in a way that invites critical dialogue Her work is the first to set out the debate over corporal punishment in multidisciplinary terms pertinent to Canadian society She brings together in one place a wide variety of thought and data which can be consulted by all Canadians concerned with the welfare of children
