Koteswara Rao, 2011-10-07 Corporate Social Responsibility CSR has been on the agenda in India for quite some time

The private sector is generally more active in this area than the Governmental and public sector and the situation is slowly changing. The concept of CSR is finally coming out of the purview of doing social good and is fast becoming a business necessity. This approach to CSR is gaining ground and many corporate houses are realizing the benefits they get in business by extending help to their workers, local community and society at large. There are many corporate companies and voluntary foundations in India who are doing commendable work in education, health, environment and energy under CSR. CSR can also be extended to public libraries because public libraries are considered as social institutions providing basic information for social, economic and cultural development of citizens and to sustain lifelong learning for students. Public libraries play a vital role in disseminating existing knowledge and promote the creation of new knowledge.

Handbook of Research on New Literacies Julie Coiro, Michele Knobel, Colin Lankshear, Donald J. Leu, 2014-04-04. Situated at the intersection of two of the most important areas in educational research today, literacy and technology, this handbook draws on the potential of each while carving out important new territory. It provides leadership for this newly emerging field, directing scholars to the major issues, theoretical perspectives and interdisciplinary research pertaining to new literacies. Reviews of research are organized into six sections: Methodologies, Knowledge and Inquiry, Communication, Popular Culture, Community and Citizenship, Everyday Literacies, Instructional Practices and Assessment. Multiple Perspectives on New Literacies Research. FEATURES: Brings together a diverse international team of editors and chapter authors. Provides an extensive collection of research reviews in a critical area of educational research. Makes visible the multiple perspectives and theoretical frames that currently drive work in new literacies. Establishes important space for the emerging field of new literacies research. Includes a unique Commentary section. The final section of the Handbook reprints five central research studies. Each is reviewed by two prominent researchers from their individual and different theoretical position. This provides the field with a sense of how diverse lenses can be brought to bear on research as well as the benefits that accrue from doing so. It also provides models of critical review for new scholars and demonstrates how one might bring multiple perspectives to the study of an area as complex as new literacies research. The Handbook of Research on New Literacies is intended for the literacy research community broadly conceived, including scholars and students from the traditional reading and writing research communities in education and educational psychology as well as those from information science, cognitive science, psychology, sociolinguistics, computer-mediated communication and other related areas that find literacy to be an important area of investigation.
