

The Galapagos turquoise backdrop coaxes the jazzy, fresh-faced sectional to sing. Mixing organically shaped table elements call for the wonderful juxtaposition of the classic chairs.

Pillows of silk, velvet and embroidery layer the unexpected boho drama.

Vintage floral motif wallpaper crisply framed is the cherry atop the laid-back and inviting sectional.

Europeans as Coastal Brokers in the West and

West-Central African Slave Trade (1680-1720) Maria Inês Godinho Guarda, 2025-05-19 The years between 1680 and 1720 saw the intensification of the regional slave trade in West Africa Previous scholarship has focused almost exclusively on Africans and Afro descendants as brokers in the region placing Europeans as Atlantic intermediaries Europeans as Coastal Brokers in the West and West Central African Slave Trade 1680 1720 argues that not only was European mediation in Africa deeply interwoven with endogenous trade networks but also that it was eagerly desired by the powerful potentates of the hinterland as a means of increasing their political and economic power over the region Examining the interconnected interests of coastal authorities and Europeans this book demonstrates that Europeans were the key brokers in the

A New Coast Jeffrey Peterson,2019-11-26 This is a timely book It should be mandatory reading Minnesota Star Tribune More severe storms and rising seas will inexorably push the American coastline inland with profound impact on communities infrastructure and natural systems In A New Coast Jeffrey Peterson draws a comprehensive picture of how storms and rising seas will change the coast Peterson offers a clear eyed assessment of how governments can work with the private sector and citizens to be better prepared for the coming coastal inundation Drawing on four decades of experience at the Environmental Protection Agency and the United States Senate Peterson presents the science behind predictions for coastal impacts He explains how current policies fall short of what is needed to effectively prepare for these changes and how the Trump Administration has significantly weakened these efforts While describing how and why the current policies exist he builds a strong case for a bold new approach tackling difficult topics including how to revise flood insurance and disaster assistance programs when to step back from the coast rather than build protection structures how to steer new development away from at risk areas and how to finance the transition to a new coast Key challenges including how to protect critical infrastructure ecosystems and disadvantaged populations are examined Ultimately Peterson offers hope in the form of a framework of new national policies and programs to support local and state governments He calls for engagement from the private sector and local and national leaders in a campaign for a new coast A New Coast is a compelling assessment of the dramatic changes that are coming to America s coast Peterson offers insights and strategies for policymakers planners and business leaders preparing for the intensifying impacts of climate change along the coast Coastal Geology Juan A.
