Two Roads to War Robin Higham, 2012-06-15 Noted aviation historian Robin Higham has written this comparative study of the evolution of the French and British air arms from 1918 to 1940 to determine why the Armée de l'Air was defeated in June 1940 but the Royal Air Force was able to win the battle over Britain in September After analyzing the structure men and matériel of the air arms and the government and economic infrastructure of both countries he concludes that the French force was dominated by the Armée de Terre had no suitably powerful aero engines and suffered from the chaos of French politics In contrast the independent RAF evolved into a sophisticated scientifically based force supported by consistent government practices Higham's thorough examination however finds the British not without error

Finnish Military Effectiveness in the Winter War, 1939-1940 Pasi Tuunainen, 2016-06-25 This book analyzes the multifaceted phenomenon of Finnish military effectiveness in the Winter War 1939-40 Drawing on a wide array of primary and secondary sources Pasi Tuunainen shows how by focusing on their own strengths and pitting these against the weaknesses of their adversary the Finns were able to inflict heavy casualties on the Red Army whilst minimizing their own losses The Finns were able to use their resources for effective operational purposes and perform almost to their full potential The Finnish small unit tactics utilized the terrain and Arctic conditions for which they had prepared themselves as well as forming cohesive units of well motivated and qualitatively better professional leaders and citizen soldiers who could innovate and adapt The Finnish Army had highly effective logistics support and supply systems that kept the troops fighting War,

Defence Planning and Uncertainty Stephan Frühling, 2014-04-24 How can countries decide what kind of military forces they need if threats are uncertain and history is full of strategic surprises? This is a question that is more pertinent than ever as countries across the Asia Pacific are faced with the military and economic rise of China. Uncertainty is inherent in defence planning but different types of uncertainty mean that countries need to approach decisions about military force structure in different ways. This book examines four different basic frameworks for defence planning and demonstrates how states can make decisions coherently about the structure and posture of their defence forces despite strategic uncertainty. It draws on case studies from the United States, Australian and New Zealand, each of which developed key concepts for their particular circumstances and risk perception in Asia. Success as well as failure in developing coherent defence planning frameworks holds lessons for the United States and other countries as they consider how best to structure their military

forces for the uncertain challenges of the future *Waging War, Planning Peace* Aaron Rapport, 2015-05-07 As the U S experience in Iraq following the 2003 invasion made abundantly clear failure to properly plan for risks associated with postconflict stabilization and reconstruction can have a devastating impact on the overall success of a military mission In *Waging War Planning Peace* Aaron Rapport investigates how U S presidents and their senior advisers have managed vital noncombat activities while the nation is in the midst of fighting or preparing to fight major wars He argues that research from psychology specifically construal level theory can help explain how individuals reason about the costs of postconflict noncombat operations that they perceive as lying in the distant future In addition to preparations for Phase IV in the lead up to the Iraq War Rapport looks at the occupation of Germany after World War II the planned occupation of North Korea in 1950 and noncombat operations in Vietnam in 1964 and 1965 Applying his insights to these cases he finds that civilian and military planners tend to think about near term tasks in concrete terms seriously assessing the feasibility of the means they plan to employ to secure valued ends For tasks they perceive as further removed in time they tend to focus more on the desirability of the overarching goals they are pursuing rather than the potential costs risks and challenges associated with the means necessary to achieve these goals Construal level theory Rapport contends provides a coherent explanation of how a strategic disconnect can occur It can also show postwar planners how to avoid such perilous missteps **Deterrence, Coercion, and Appeasement** David French, 2022 A compelling and original survey of British grand strategy in the inter war period underlining the inexorable relationships between foreign policy grand strategy military force intelligence finance and not least domestic politics and public opinion *Tokens of Power* Ann Hironaka, 2017-03-06 What motivates going to war This book reexamines how leaders make decisions based on appearances of power over military reality **Make It a Green Peace!** Frank Zelko, 2013-04-03 The emergence of Greenpeace in the late 1960s from a loose knit group of anti nuclear and anti whaling activists fundamentally changed the nature of environmentalism its purpose philosophy and tactics around the world And yet there has been no comprehensive objective history of Greenpeace s origins until now *Make It a Green Peace* draws upon meeting minutes internal correspondence manifestos philosophical writings and interviews with former members to offer the first full account of the origins of what has become the most recognizable environmental non governmental organization in the world Situating Greenpeace within the peace movement and counterculture of the 1960s Frank Zelko provides a much deeper treatment of the group s groundbreaking brand of radical media savvy direct action environmentalism than has been previously attempted Zelko traces the complex intellectual and cultural roots of Greenpeace to the various protest movements of the 1950s and 1960s highlighting the influence of Quakerism with its practice of bearing witness Native American spirituality and the non violent resistance of Gandhi Unlike the more strait laced less confrontational Sierra Club and Audubon Society early Greenpeacers smoked dope dropped acid wore their hair long and put their bodies on the line interposing themselves between the harpoons of whalers and the clubs of seal hunters to save the

The Future of War Lawrence Freedman,2017-10-10 An award winning military historian professor and political adviser delivers the definitive story of warfare in all its guises and applications showing what has driven and continues to drive this uniquely human form of political violence Questions about the future of war are a regular feature of political debate strategic analysis and popular fiction Where should we look for new dangers What cunning plans might an aggressor have in mind What are the best forms of defense How might peace be preserved or conflict resolved From the French rout at Sedan in 1870 to the relentless contemporary insurgencies in Iraq and Afghanistan Lawrence Freedman a world renowned military thinker reveals how most claims from the military futurists are wrong But they remain influential nonetheless Freedman shows how those who have imagined future war have often had an idealized notion of it as confined brief and decisive and have regularly taken insufficient account of the possibility of long wars hence the stubborn persistence of the idea of a knockout blow whether through a dashing land offensive nuclear first strike or cyberattack He also notes the lack of attention paid to civil wars until the West began to intervene in them during the 1990s and how the boundaries between peace and war between the military the civilian and the criminal are becoming increasingly blurred Freedman s account of a century and a half of warfare and the often misconceived thinking that precedes war is a challenge to hawks and doves alike and puts current strategic thinking into a bracing historical perspective

Strategy and Politics Colin S. Gray,2016-01-29 This book examines the subject of strategy and its relationship with politics Despite the fact that strategy is always the product of political process the relationship between the two concepts and their ancillary activities has scarcely been touched by scholars This book corrects that serious deficiency and explains the high relevance of political factors for matters of general defence Each chapter aims to show how and why strategy and politics interact and how this interaction has had significant consequences historically Neither strategy nor politics can make sense if considered alone Strategy requires direction that can only be provided by political process while politics cannot be implemented without strategy In summary this volume will explain what strategy is and is not why strategy is essential what strategy does and how it does it how strategy is made and executed Written by a leading scholar and former practitioner this book will be essential reading for all students of military strategy strategic studies security studies and war and conflict studies

The EU and Military Operations Katarina Engberg,2013-10-30 This book is a comparative study which aims to answer the question under what circumstances does the EU undertake military operations Since 2003 the EU has carried out six military operations What accounts for this historic

development The EU and Military Operations examines the dynamics behind the EU's collective use of force and situates the EU in the context of a global division of labour with regard to military crisis management It centres on the study of two main cases of EU military operations the non case when an operation was planned in the Lebanon war 2006 but did not occur and the positive case of EUFOR RD Congo that same year Drawing upon these findings the author creates an innovative analytical framework based upon the techniques of defence planning and applies this to the cases studies with the purpose of identifying the main driving and inhibiting factors behind the operations Key findings derived from this analysis include the growing importance of local actors in facilitating or impeding the EU's deployment of military force and the enhanced role of regional organisations as security providers The book will be of much interest to students of European security EU politics strategic studies humanitarian intervention security studies and IR in general

Indian and American Perspectives on Technological Developments in the Maritime Domain and Their Strategic Implications in the Indian Ocean Region Vice Admiral Pradeep Kaushiva, Commander Kamlesh K Agnihotri, 2013-04-15 The maritime domain hosting the highways of global prosperity through trade industrial raw material and energy links rates high in its potential for conflict As the global pendulum of economic vibrancy swings eastwards the Indian Ocean Region IOR has been receiving increasing attention from all actors state as well as non state ones and now presents itself in sharp focus as one of the volatile seascapes on this earth The navies operating in the region will therefore need to depend on high technology and associated doctrines and procedures so as to effectively deal with the wide spectrum of challenges therein It will also become incumbent upon such littoral states as can afford the high cost of technology to catch up so as to maintain their relevance in the great game being played out in their very own backyard The United States as a leader in inventing and exploiting technology sets its own benchmarks in internalization of advanced technologies to undertake maritime missions at and from the sea in support of its military operations ashore China on the other hand has been striving towards achieving asymmetric war fighting capabilities supported by other developing technologies as well as core capabilities like the Beidou position fixing system which would be central to network centric operations including missile guidance systems As the IOR increasingly transforms into an arena of extra regional power play the implications of technologically enabled confrontations and their impact on resident states are poised to weigh in on a scale never imagined before There is thus a greater need for India to gain in depth knowledge of and develop a perspective on advanced technology sensors weapons supporting infrastructures doctrines and futuristic concepts in the maritime domain and their potential as strategic game changers in the IOR This book aims to foster greater understanding of the challenges facing the IOR and also look at how the technological advances in the maritime domain may possibly handle such challenges It should provide useful resource material to those investigating the impact of technology on meeting the maritime challenges in the IOR

Contemporary Military Theory Jan Angstrom, J.J. Widen, 2014-07-17 The book aims to provide the reader with a state of the art introduction to classic and modern military theory The text accounts for the

most important theories within the field by developing and analyzing these theories as well as problematizing both their normative and explanatory aims. While focusing on military theory, the book does not only reflect a single way of relating to knowledge of war and warfare but furthers learning by introducing contrasting perspectives as well as constantly criticizing the theories. There is a clear need for an introductory text for the entire field of military theory that focuses wholeheartedly on the theories, not on their context or how they are expressed in practice during war. This book covers such questions as how we should understand the changing character of war, the utility of force, and how the pursuit of political ends is achieved through military means. It draws upon and illustrates military thought through a wide ranging number of examples from the Napoleonic Wars to the current war in Afghanistan. This book will be of great interest for students of military theory, strategic studies, security studies, and defence studies. **Genesis, Employment, Aftermath** Alaric Searle, 2015-06-19

The employment of the first tanks by the British Army on the Western Front in September 1916, although symbolic rather than decisive in its effects, ushered in a new form of warfare: tank warfare. While much has been written on the history of the tank, this volume brings together a collection of essays which uncover new aspects of the history of these early machines. Leading military historians from Britain, France, and Germany offer insights into the emergence of the tank before the First World War, during the conflict, as well as what happened to them after the guns fell silent on the Western Front. Based on painstaking research in archives across Europe, each of the chapters sheds new light on different aspects of the history of First World War tanks. Two chapters consider why the Germans failed to recognize the possibilities of the tank and why they were so slow to develop their own machines after the first British tank attack in 1916. Two other chapters chart the history of French tanks on the Western Front and after the end of the war. Tank communication, the employment of British tanks on the Western Front, as well as the activities of British Tank Corps intelligence, are also explained. The use of British tanks in Palestine and in the Russian Civil War is examined in detail for the first time. The volume also reflects on the impact of the Battle of Cambrai, both in terms of its psychological impact in Britain and the power it exerted over military debates until the end of the Second World War. The aim of the book is to reconsider the history of First World War tanks by widening the historical perspective beyond Britain to include France and Germany and by reflecting on the pre-1914 and post-1918 history of these new weapons of war. *Planning for War at Sea* Evan Wilson, Paul M. Kennedy, 2025-02-04

How have navies contemplated possible enemies? How did they learn or fail to learn once operations began? How does this analysis inform today's planning for future conflict? These questions guide the noted historians and naval strategists who contributed to *Planning for War at Sea*. A central theme is the regular failure of navies' best-laid plans. Covering four centuries of naval warfare, the chapters illustrate the challenges all navies faced when considering possible enemies. Even during the Age of Sail, ships were among the most expensive and long-term national endeavors. Navies therefore planned well in advance for future wars, usually without knowing their adversaries or how they would fight them at sea. Building a capable navy requires sustained

investment in naval infrastructure long before the fighting starts In the final chapters naval strategists expand on this historical analysis to address how effectively or ineffectively today s three leading navies Russia China and the United States have configured themselves during the post Cold War era in preparing for future great power conflict This collection is an important work for strategists scholars and policymakers

American Foreign Policy in a Globalized World David P. Forsythe, Patrice C. MacMahon, Andrew Wedeman, 2013-05-13 In this volume several leading foreign policy and international relations experts consider the long term prospects and implications of US foreign policy as it has been shaped and practiced during the presidency of George W Bush The essays in this collection based on the research of well respected scholars such as Ole Holsti Loch Johnson John Ruggie Jack Donnelly Robert Leiber Karen Mingst and Edward Luck offer a clear assessment while US resources are substantial Washington s ability to shape outcomes in the world is challenged by its expansive foreign policy goals its exceptionalist approach to international relations serious questions about the limits of its hard power resources as well as fundamental changes in the global system Illustrating one of the central ironies of the contemporary situation in foreign affairs and international relations that at the very time of the unipolar moment the world has become globalized to such an extent that the unilateralism of the Bush Administration leads as much to resistance as it does to coercion compliance and cooperation American Foreign Policy in a Globalized World will be of interest to students and scholars of politics and international relations
