by the Gun in Chad Marielle Debos,2016-10-15 How do people live in a country that has experienced rebellions and state organised repressions for decades and that is still marked by routine forms of violence and impunity What do combatants do when they are not mobilised for war Drawing on over ten years of fieldwork conducted in Chad Marielle Debos explains how living by the gun has become both an acceptable form of political expression and an everyday occupation Contrary to the popular association of violence and chaos she shows that these fighters continue to observe rules frontiers and hierarchies even as their allegiances shift between rebel and government forces and as they drift between Chad Libya Sudan and the Central African Republic Going further she explores the role of the globalised politico military entrepreneurs and highlights the long involvement of the French military in the country Ultimately the book demonstrates that ending the war is not enough The issue is ending the inter war which is maintained and reproduced by state violence Combining ethnographic observation with in depth theoretical analysis Living by the Gun in Chad is a crucial contribution to our understanding of the intersections of war and peace **Piracy and Maritime Crime: Historical and Modern Case Studies** Bruce A.

The

Linguistic Cycle Elly van Gelderen,2011-04-08 Elly van Gelderen provides examples of linguistic cycles from a number of languages and language families along with an account of the linguistic cycle in terms of minimalist economy principles A cycle involves grammaticalization from lexical to functional category followed by renewal Some well known cycles involve negatives where full negative phrases are reanalyzed as words and affixes and are then renewed by full phrases again Verbal agreement is another example full pronouns are reanalyzed as agreement markers and are renewed again Each chapter provides data on a separate cycle from a myriad of languages Van Gelderen argues that the cross linguistic similarities can

be seen as Economy Principles present in the initial cognitive system or Universal Grammar She further claims that some of the cycles can be used to classify a language as analytic or synthetic and she provides insight into the shape of the earliest human language and how it evolved "Women, Manuscripts and Identity in Northern Europe, 1350-1550" Joni M. Yates,2012-02-15 Americans have learned in elementary school that their country was founded by a group of brave white largely British Christians Modern reinterpretations recognize the contributions of African and indigenous Americans but the basic premise has persisted This groundbreaking study fundamentally challenges the traditional national storyline by postulating that many of the initial colonists were actually of Sephardic Jewish and Muslim Moorish ancestry Supporting references include historical writings ship manifests wills land grants DNA test results genealogies and settler lists that provide for the first time the Spanish Hebrew Arabic and Jewish origins of more than 5 000 surnames the majority widely assumed to be British By documenting the widespread presence of Jews and Muslims in prominent economic political financial and social positions in all of the original colonies this innovative work offers a fresh perspective on the early American experience **Mergent Company Archives Manual** ,2007 The Immutable Laws of Mankind Alastair Davidson,2012-05-02 The key question for the history of universal human rights is why

it took so long for them to become established as law The main theme of this book is that the attainment of universal human rights required heroic struggle first by individuals and then by ever increasing numbers of people who supported those views against the major historical trends Universal human rights are won from a hostile majority by outsiders The chapters in the book describe the milestones in that struggle The history presented in this book shows that in most places at most times even today for concrete material reasons a great many people oppose the notion that all individuals have equal rights The dominant history since the 1600s has been that of a mass struggle for the national democratic state This book argues that this struggle for national rights has been practically and logically contradictory with the struggle for universal rights It would only be otherwise if there were free migration and access to citizenship on demand by anybody This has never been the case Rather than drawing only on European sources and being limited to major literary figures this book is written from the Gramscian perspective that ideas mean little until they are taken up as mass ideologies It draws on sources from Asia and America and on knowledge about mass attitudes globally and throughout history
