Gender Balance and Gender Bias in Education Deirdre

Raftery, Maryann Valiulis, 2013-09-13 This book presents a compelling range of international research on the issues of gender balance and gender bias in education. The chapters draw on cutting edge work from the US, Latin America, the UK, Ireland, and Africa, presenting readers with new insights into how educators and students often negotiate deeply ingrained prejudices that are expressed in gendered terms. The book reflects research that draws on a range of methodologies and both historical and contemporary education contexts are examined. Drawing on historical research, the book widens our understanding of gender issues in education and provides chapters on physical activity for girls in nineteenth century America and on the patriarchal imperative in mission education in Africa in the nineteenth century. Turning to research on contemporary education settings, the book explores the global phenomenon of the feminisation of teaching. It also illustrates how teachers work in classrooms in which boys' expressions of masculinities explicitly challenge school order and looks at the performance of both masculinities and femininities in several education contexts. The book also includes absorbing work on the practices and processes that contribute to the gendering of digital technologies and it demonstrates ways in which parents unwittingly accept the gendered management of internet risk for their daughters. This book was published as a special issue of *Gender and Education*.

Flora White Linda C. Morice, 2016-10-31 *Flora White: In the Vanguard of Gender Equity* draws on a collection of personal papers only recently made available to scholars to present the life of a colorful New England educator who lived from the Civil War to the Cold War. Throughout her career, White worked to promote the physical and intellectual growth of girls and young women beyond the narrow gender stereotypes of the day. Although White's name is not a household word, this book represents a newer form of biography in which the life of a lesser known individual serves as a lens for understanding larger social and cultural developments. In Flora White's case, this newer biographical approach produced findings to inform research in both educational history and gender studies. For example, White's papers correct some longstanding misconceptions about the origins of the progressive education movement and the role women played in it. White's sources also shed light on the complicated relationships of educated but marginalized U.S. women and the prominent men who mentored them. In addition, White's papers show that in order to protect herself from those who might find her words objectionable, she used coded language such as poetry to counter sexist stereotypes and advance her desire for a fuller life for her students and herself. Although upon her death a newspaper obituary praised White for being recognized by men of note in educational circles, her efforts to promote the physical and intellectual development of girls and women helped to create opportunity that is still unfolding today.
