 present an update of their research three years later The other half of the authors are entirely new Both of these books grew
 out of symposia sponsored by the Polymeric Materials Science and Engineering Division of the American Chemical Society
 The papers for the present book are based loosely on a symposium held at the Miami Beach meeting in April 1985
 Unfortunately interest in polymers from renewable resources fluctuates with the price and availability of petroleum oil At the
 time of writing this preface the price is low and appears to be headed lower still *An Introduction to Biomaterials, Second
