Murder from Within Fred T. Newcomb, Perry Adams, 2011-11-03 Written in 1974 Murder From Within will show what actually happened to President Kennedy the consequences of his murder and what action Americans can take to protect their institutions from further internal assault The problem of usurpation from within and illegitimate and bloody transfer of power is as old as political history itself Betrayal from within from the leaders own inner circle dates all the way back to Julius Caesar and Jesus Christ Centuries ago several Roman Emperors were killed by their own Praetorian guards This plot which involved only a handful of high officials and a few Secret Service Agents called for President Kennedy to be maneuvered to Dallas and executed in public His body was then forcibly removed from the control of the Dallas Coroner and flown to Washington D C to a military hospital There autopsy findings were supervised to foil a later investigation and implicate a scapegoat The plot required a high probability of success Therefore it was self contained carefully recruited members of the Secret Service the Presidents guards murdered him The portability of a motorcade allowed the assassins to escape and the evidence to remain under their control With their obvious cover as guards the Secret Service could ensure that the planning would result in the replacement of one chief executive with another who now had the power to cover the crime up The scapegoat for the crime was placed near the motorcade by being told to look for work at locations on one of two likely parade routes Once he had a job the motorcade was planned to pass in front of where he worked In this way it would appear that he had found his position by accident To plan the route first and then place the scapegoat in position would raise serious questions in an investigation about his prior knowledge Seven years in the making Murder From Within shows exactly and in detail how a small high level group within Kennedys own Cabinet betrayed him and killed him to benefit an ambitious Vice President determined to become President no matter what

Organizational change is often insider led and supported by internal consultants and change agents Most of what is written about change comes from the perspective of external consultants or from academics researching the activities of those with insider change roles Changing Organizations from Within is unusual in providing a range of authentic insider accounts The editors define insiders as employees who lead and support change efforts within their own organizations and those psychoanalytically aware external consultants external insiders who work closely with organizations and use the dynamics of transference and projection in their relationships with clients to illuminate organizational issues Each chapter is written by an author with experience of different kinds of insider relationships with their client organizations Some work inside as employees Some are external consultants whose work involves developing insightful insider perspectives The book's editors and several of the authors are graduates or have been faculty members of London's Tavistock Institute Advanced Organizational Consultation programme with experience of running development programmes for consultants and of coaching insiders Changing Organizations from Within examines the pulls on role and identity that can easily undermine competence and practice Understanding the system psycho dynamics present in organizations helps consultants and change agents to make use of an insider perspective without becoming enmeshed in the client organization's regressive and inertial dynamics The authors provide practical advice to help insiders navigate organizational space make sense of tricky situations and work more mindfully to help organizations change *Innovation from Within* Stephanie Berzin, Humberto
