

Principal's Message

"Success comes to those who work hard and stay with those who don't rest on the laurels of the past."

We live today in a world that is so different from the one we grew up in, the one we were educated in. The world today is changing at such an accelerated rate and we as educators need to pause and reflect on this entire system of education. *Are our Schools well equipped to prepare our children to face the challenges that the future holds?*

This is the question that motivates us to go through a continuous process of reflection and hence we at GBIS work at implementing a well balanced curriculum to ensure that the children of our School will not just love their School years but truly be prepared to face life's challenges.

Aristotle once said that, **"Educating the mind without educating the heart is no education at all."** Even as we impart education to match the advancement in the technology and globalization, we march our children ahead with GBIS' ethos of moral values and principles. We endeavour constantly to instill these qualities in our children. We pride ourselves to help them grow and develop into sensitive and responsible citizens of the next generation.

A committed, caring and supportive management, dedicated teachers co-operative parents blend harmoniously to create a child-centric School. It is natural to find in this ambience, the intensive use of a variety of thinking activities, strategies and group dynamics so that the classrooms become alive.

Teamwork is the hallmark of GBIS. I am very sure through collaborative effort, we can achieve more to benefit our students who are the future leaders of tomorrow.

With sincere and warm regards

Poonam Rani

Beyond the Science of Reading Natalie Wexler,2025-01-30 In this provocative and timely book education writer Natalie Wexler argues that the best way to end the reading wars is to recognize that learning to read is inextricably linked to learning in general The science of reading movement has done much to improve instruction in foundational skills But that hard won progress may be reversed unless we also help children acquire the knowledge and vocabulary they need to understand complex text At the same time the science of learning movement has introduced many educators to evidence based teaching principles that can be effective for all students In Beyond the Science of Reading Wexler addresses a missing piece of the conversation the ways in which typical reading comprehension and writing instruction conflict with those principles Wexler also offers practical solutions for bringing science informed literacy instruction to scale and reveals why Teaching phonics isn t enough to create proficient readers Building knowledge is the key to unlocking reading comprehension Writing instruction holds untapped potential to boost literacy and learning Instruction grounded in cognitive science can narrow achievement gaps Current curriculum evaluation methods may be steering schools wrong Beyond the Science of Reading charts a bold path forward with a new
