Le projet Planarch 2, 2007 Terra 2008 Leslie Rainer, Angelyn Bass Rivera, David Gandreau, 2011-06-14 Earthen architecture constitutes one of the most diverse forms of cultural heritage and one of the most challenging to preserve. It dates from all periods and is found on all continents but is particularly prevalent in Africa where it has been a building tradition for centuries. Sites range from ancestral cities in Mali to the palaces of Abomey in Benin, from monuments and mosques in Iran to Buddhist temples on the Silk Road to Spanish missions in California. This volume's sixty-four papers address such themes as earthen architecture in Mali, the conservation of living sites, local knowledge systems, and intangible aspects, seismic and other natural forces, the conservation and management of archaeological sites, research advances, and training.

The Social Action-Oriented Approach in Language Teaching Ahmet Acar, Christian Puren, 2024-09-24 The action-oriented approach, renamed as the social action-oriented approach in this book, was first introduced by the Council of Europe (CoE) in its official document *The Common European Framework of Reference for Languages* (CEFR) 2001. This book aims to provide a detailed explanation of this approach in all its dimensions: its origins, how it has developed as a new methodology within its new didactic configuration, how to implement it in language textbooks and the classroom, as well as the issue of designing social action-oriented curricula and programs. We believe this book will be a useful resource for curriculum developers, language textbook writers, researchers in the language teaching field, language teacher trainees, language teachers, K-12 and university students.

Democratic Republic of the Congo International Monetary Fund. Fiscal Affairs Dept.,2023-01-30 This technical report discusses the results of the Public Investment Management Assessment PIMA of the Democratic Republic of Congo DRC undertaken in March 2022 Despite some recovery in the 2000s the levels of public investment in the DRC remain well below the average for comparator countries and access and quality of infrastructure are very poor with major risks of deterioration While the government aims to meet part of these needs by creating fiscal space successful infrastructure development will hinge on improvements in investment efficiency which can be achieved by strengthening public investment management practices Public investment management in the DRC suffers from weaknesses across the whole project cycle both on paper legal and regulatory framework and in practice Efficient project management is hampered by administrative and legal fragmentation which leads to dilution of capacity and by budget credibility issues This report proposes seven high priority recommendations that could greatly improve public investment management in the short to medium term The report also includes the results of the climate module of the PIMA evaluation which reflect that the DRC's commitments in the fight against climate change are beginning to feed into public investment management practices
