## **Get By In Greek 1998:**

A History of the War in the Balkans R. Craig Nation, 2018-04-04 The Balkans is often described as a grim backwater a no man s land of world politics in the words of a post World War II study foredoomed to conflict springing from heterogeneity The stereotype is false but it has been distressingly influential in shaping perceptions of the Balkan conflict and its origin By encouraging pessimism about prospects for recovery it may also make it more difficult to sustain commitments to post conflict peace building This book seeks to refute simplistic ancient hatreds explanations by looking carefully at the sources and dynamics of the Balkan conflict in all of its dimensions **Fifteen into one?** Wolfgang Wessels, Andreas

Maurer, Juergen Mittag, 2018-07-30 This electronic version has been made available under a Creative Commons BY NC ND open access license This book takes up traditional approaches to political science It aims to offer a mixture of conventional and specific analyses and insights for different groups of readers In view of the European Union s multi level and multi actor polity the book highlights the complex procedural and institutional set up of nation states preparing and implementing decisions made by the institutions of the European Community EC In looking at the emerging and evolving realities of the European polity it shows how European institutions and Member States re act and interact in a new institutional and procedural set up It explores how governmental and non governmental actors in different national settings adapt to common challenges constraints and opportunities for which they are mainly themselves responsible The book discusses the Belgian policy toward European integration as a significant demonstration of its commitment to multilateralism and international co operation in security and economic affairs Attitudes to European integration in Denmark Germany Finland Greece and Spain are discussed Tendencies towards Europeanisation and sectoralisation of the ministerial administration during the process of European integration and the typical administrative pluralism of the Italian political system seem to have mutually reinforced each other Strong multi level players are able to increase their access and influence at both levels and to use their position on one level for strengthening their say on the other German and Belgian regions might develop into these kinds of actors A persistent trend during the 1990s is traced towards stronger national performers particularly in terms of adaptations and reactions to Maastricht Treaty **Metaphors of ANGER across Languages: Universality and Variation** Zoltan

Kövecses, Réka Benczes, Veronika Szelid, 2024-11-04 Anger is one of the basic emotions of human emotional experience informing and guiding many of our choices and actions Although it has received considerable scholarly attention in a number of disciplines including linguistics a basic question has still remained unresolved why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why It also investigates the role that metonymies might play in the emergence of anger related metaphors and in what ways

context influences or shapes anger metaphors and thereby the resulting folk model of anger No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience language and the larger cultural context Mediterranean Security Into the Coming Millennium Stephen J. Blank,1999

**The Cambridge World History of Slavery: Volume 1, The Ancient Mediterranean World** Keith Bradley,Paul Cartledge,2011-03-07 Volume 1 in the new Cambridge World History of Slavery surveys the history of slavery in the ancient Mediterranean world Although chapters are devoted to the ancient Near East and the Jews its principal concern is with the societies of ancient Greece and Rome These are often considered as the first examples in world history of genuine slave societies because of the widespread prevalence of chattel slavery which is argued to have been a cultural manifestation of the ubiquitous violence in societies typified by incessant warfare There was never any sustained opposition to slavery and the new religion of Christianity probably reinforced rather than challenged its existence In twenty two chapters leading scholars explore the centrality of slavery in ancient Mediterranean life using a wide range of textual and material evidence Non specialist readers in particular will find the volume an accessible account of the early history of this crucial phenomenon Modals in the Languages of Europe Björn Hansen,Ferdinand de Haan,2009-12-15 This book is the first comprehensive survey of modals and modal constructions in the languages of Europe It is a collaborative effort between scholars from Europe and the United States stemming from a workshop on Modals in the Languages of Europe in Valencia The aim of this book is to describe the properties of modals and modal constructions in the European area and to compare the systems in individual languages or language families from an areal and genetic perspective For the sake of contrast the book also looks at the expression of modality in some languages just outside of Europe The book consists of fourteen chapters on modal systems in individual languages or language families written by experts in the respective languages and an introductory and concluding chapter written by the editors The book gives both a description of the modals in the individual languages and an account of the nature and status of modals in general It provides the reader with a theoretical account of how modals and modal constructions are grammaticalized This theoretical account is informed by the parameters of grammaticalization of Christian Lehmann These parameters were chosen because they are language independent as opposed to more language specific criteria for instance the NICE criteria for English The parameters themselves are examined as well for their suitability as part of any theory of grammaticalization The book thus gives readers access to a collection of data on modality that surpasses most works in this field and also provides a fresh perspective on issues of grammaticalization and language contact It is therefore of interest to scholars of modality language contact and areal linguistics grammaticalization theory and typology *International Relations Theory and the Asia-Pacific* G. John. Ikenberry,Michael Mastanduno,2003-05-21 What will the Asia Pacific rim look like in the years ahead What tools will

international relations theorists need to understand the complex relationship among China Japan and the United States as the three powers shape the economic and political future of this crucial region Some of the best and most innovative scholars in international relations and Asian area studies gather here with the working premise that stability in the broader Asia Pacific region is in large part a function of the behavior of and relationships among these three major powers Each author analyzes the foreign policy behavior of one or more of these states and or relations among them in an effort to make claims about the prospects for regional stability Some of the chapters focus on security relationships some on economic relations and some on the interaction of the two The authors do not promote any particular theoretical perspective but instead draw on the full diversity of theoretical approaches in contemporary international relations scholarship to illuminate international interactions among the Pacific powers The creative collaboration of international relations and Asian studies specialists presents the opportunity to assess the applicability of Western categories of analysis to the beliefs and behaviors of Asian actors The scholars in this volume share the conviction that a deeper understanding of the effects of cultural divides between Asian and American policymakers is essential if the Pacific rim s economic and regional security is to be safeguarded

*Mediterranean Security Into the Coming Millennium* Stephen Blank,1999 The papers included in this volume represent just such an effort to lay a firmer foundation for this continuing dialogue and to bring together different points of view In October 1998 the Strategic Studies Institute assisted by Pepperdine University assembled a distinguished group of analysts from the United States Europe and the Middle East in Florence Italy At a conference titled Mediterranean Security into the Coming Millennium the task of the participants was to address current regional security issues in the Balkans Middle East and the Aegean as well as the perceptions of the individual states the relevant security organizations NATO and the European Union and the players and major external actors like the United States and Russia These papers cover the many areas discussed at the conference and should advance the debate on Mediterranean security both in the United States and abroad

**1-2 Thessalonians** Nijay K. Gupta,2016-07-12 In the first century the Thessalonian church grieved deaths in their community endured harsh persecution and struggled with questions about the future Paul offered them the comforts and reassurances of hope in the Messiah Jesus But he offered far more than wishful thinking or pie in the sky comfort Paul s emphasis on hope in the Messiah Jesus involved capturing a vision of God s redeemed and just future in order to see and live faithfully today Paul did not believe in a passive hope but an active hope where if the Day of the Messiah is a beacon believers set their course and diligently move toward it That diligence is especially captured by love for Christian brothers and sisters commitment to honest and productive work and obedience to the truth of the gospel of Lord Messiah Jesus **US Foreign Policy in the Eastern Mediterranean** Spyridon N. Litsas,2020-02-06 This book examines US foreign policy in the Eastern Mediterranean and the region s key role in the practice and evolution of American exceptionalism The political

developments in the Eastern Mediterranean during the 19th and the first half of the 20th centuries gave to the US opportunities to express in the most explicit way its anti colonialism the fervent support of open and democratic societies and its willingness to openly confront tyranny and oppression whenever this was possible or necessary for American interests Since that time the region has been a testing ground for the core elements of American foreign policy deployed worldwide The monograph shows the contributions of the United States during critical moments in the region such as the First Barbary War 1801 1805 the introduction of Truman Doctrine Washington's role in the Suez Crisis the Greek junta and the Imia Crisis of 1996 It also scrutinizes the different levels of the economic military and diplomatic challenges which China Russia and Turkey present today while it also covers the American approach to the Arab Spring From a Shining City on a Hill to the current Make America Great Again mottoes this critique follows American Foreign Policy in the Eastern Mediterranean and the strong bonds that the nation established with the geostrategic political and ideological features of the region The pace of recent events and the increasing complexity of this global corner prove a challenge to America today the future and clarion call that hard work and the finest ingenuity are necessary to keep its regional hegemony and its course toward increased prosperity This work's goal is to inspire the conversations by academics diplomats leaders both political and military and most of all businessmen to this end

*Cypriot Nationalisms in Context* Thekla Kyritsi, Nikos Christofis, 2018-12-05 This book explores the different perspectives and historical moments of nationalism in Cyprus It does this by looking at nationalism as a form of identity as a form of ideology and as a form of politics The fifteen contributors to this book are scholars of different scientific backgrounds and present Cypriot nationalisms from an interdisciplinary framework including approaches such as history political science psychology and gender studies The chapters take a historical approach to nationalism and argue that the world of nations ethnic identity and national ideology are neither eternal nor ahistorical nor primordial but are rather socially constructed and function within particular historical and social contexts As a land that was and still is marked by opposed nationalisms that is Greek and Turkish Cyprus constitutes a fertile ground for examining the history the dynamics and the dialectics of nationalism

strengthening of civil society Nachmani goes on to analyse the prospects for Turkey in the twenty first century in the light of the possible integration into Europe which may leave the country s leadership free to deal effectively with domestic issues This book will make crucial reading for anyone studying Turkish politics or indeed European or European Union politics

Markantonatos,2013-10-14 This volume is an accessible yet in depth narratological study of Euripides Alcestis the earliest extant play of Euripides and one of the most experimental masterpieces of Greek tragedy not only standing in place of a satyr play but also preserving at least some of its typical features Commencing from the widely held view so lamentably ignored within the domain of Classics that a narratology of drama should be predicated upon the notion of narrative as verbal as well as visual rendition of a story this unique volume contextualizes the play in terms of its reception by the original audience locating the intricate narrative tropes of the plot in the dynamics of fifth century Athenian mythology and religion      **The**
