confrontation and effective changes emerge **Historical Dictionary of Tibet** John Powers, David Templeman, 2012-05-18
Tibet is a land bounded by the world's highest mountains and it is the repository of an ancient culture. For centuries it was viewed by Europeans as a remote mystical place populated by Buddhist masters with supernatural powers and profound wisdom. In contrast to this image it was once a warlike country whose expansionist rulers conquered a vast empire that incorporated much of central Asia and parts of China. Even now the Tibetan Plateau remains a scene of contestation both ideologically and militarily. Major popular uprisings in 1959, 1988 and 2008 have drawn the attention of the world's media and its religious teachers often attract large crowds when they travel overseas. The situation in the country remains highly volatile today as the 2008 uprising the largest and most widespread in the history of the region attests. The Historical Dictionary of Tibet is the most comprehensive dictionary published to date on Tibetan history. It covers the history of Tibet from 27,000 BCE to the present through a chronology, an introductory essay, an extensive bibliography and over 1,000 cross-referenced dictionary entries on important personalities, politics, economy, foreign relations, religion, culture, anthropology and sociology. This book is an excellent access point for students, researchers and anyone wanting to know more about Tibet.

Insights of Fermented Foods and Beverages: Microbiology and Health-Promoting Benefits Jyoti Prakash Tamang, Patricia Lappe-Oliveras, Baltasar Mayo, 2022-02-18 **Geology of the Himalayan Belt** B.K. Chakrabarti, 2016-03-04
Geology of the Himalayan Belt: Deformation, Metamorphism, Stratigraphy presents sophisticated metamorphic and igneous rock data across various Himalayan geographic sectors capturing their petrography, metamorphism, structure, mineralization and regional tectonic research. With an east-west extension of about 3000 kilometers and numerous 8000-meter peaks, the Himalayas are the most spectacular mountain ranges on earth. Since the 19th century they have provided a testing ground of global importance for the development of geodynamic concepts from isostasy over continental collision to more recently feedback mechanisms between tectonics and climate. This book collects the broad range of data that's been gathered on the Himalayas over the past 50 years, providing a comprehensive analysis and interpretation on the available data that brings the scientific community a better understanding of the geological diversity and structure of the Himalayan belt along with new techniques that have applications in a host of global geological settings. Features a vast amount of geological research data collected in the Himalayas over the past half century. Authored by a recognized global expert on the geology of the Himalayan belt. Presents analysis and interpretation techniques to aid scientists in conducting fieldwork and research. Provides the latest information on geodynamic concepts from isostasy over continental collision to more recently feedback mechanisms between tectonics and climate. **Surface Environments and Human Interactions** Rajat Mazumder, Rajib Shaw, 2024-03-12
This book describes the complex interplay between Earth's surface processes, erosion and sedimentation and human interactions. Intensive as well as extensive research has been undertaken to infer modern sedimentation processes and to infer the mode of stratigraphic sequence building. However, the

effort to understand the influence of sedimentation processes on society and the human impact on sedimentation is long overdue This is a new upcoming multidisciplinary research field that is beyond the scope of leading traditional Earth and Environmental Science journals To fill in the prodigious gap in the knowledge base this book includes in depth reviews and new data based case studies from Asia involving multidisciplinary research It covers case studies of risk management of various hazards and risk management systems at regional national and local levels The book proposes a comprehensive approach to reducing future risks by collaborating with various stakeholders and preparing for the most effective responses towards complicated hazards minimizing social damage This publication will help researchers in the field of Environment and Earth surface processes disaster risk reduction and geoscientists to have a better idea of the current trend of research in the field and will provide updated synthesis on this important topic Asia and the Americas ,1922 **Asia** ,1922
