## Getting A Job:

**Getting a Job** Mark Granovetter, 2018-06-29 This classic study of how 282 men in the United States found their jobs not only proves it's not what you know but who you know but also demonstrates how social activity influences labor markets. Examining the link between job contacts and social structure, Granovetter recognizes networking as the crucial link between economists' studies of labor mobility and more focused studies of an individual's motivation to find work. This second edition is updated with a new Afterword and includes Granovetter's influential article "Economic Action and Social Structure: The Problems of Embeddedness." Who would imagine that a book with such a prosaic title as *Getting a Job* could pose such provocative questions about social structure and even social policy? In a remarkably ingenious and deceptively simple analysis of data gathered from a carefully designed sample of professional technical and managerial employees, Granovetter manages to raise a number of critical issues for the economic theory of labor markets as well as for theories of social structure by exploiting the emerging social network perspective. Edward O. Laumann, *American Journal of Sociology*. This short volume has much to offer readers of many disciplines. Granovetter demonstrates ingenuity in his design and collection of data. Jacob Siegel, *Monthly Labor Review*. A fascinating exploration for Granovetter's principal interest lies in utilizing sociological theory and method to ascertain the nature of the linkages through which labor market information is transmitted by friends and relatives. Herbert Parnes, *Industrial and Labor Relations Review*. *Getting a Job*, 1993
