## **Getting And Spending A Primer In Economic Morality:**

**Getting and Spending** Peter L. Danner, 1994 Getting and spending conceives the economy and economic acts as essentially social After a frank look at the benefits and perils of economic abundance it moves from the universal and inevitable condition of economic scarcity to the need to use material resources and human efficiency The crucial analysis of this book centers on an understanding of gain seeking both as a human drive essential for the economy to function and as a distinctive human appetite which being prone to sensuality self glorification greed and love of power must be guided and monitored especially by the virtues of justice moderation and spiritual poverty All of this brought together produces the conclusion that as divergent as they might sometimes be moral and economic endeavors can be not only compatible but mutually confirming Provided by Amazon com

**The Economic Person** Peter L. Danner, 2002 This book emphasizes that analysis of broad economic changes treats people abstractly while a personalist view sees them as human agents who while needing and generating economic goods must still be responsive to others and be aware of values and goals beyond temporal well being Visit our website for sample chapters

**The Social Economics of Human Material Need** John Bryan Davis, Edward J. O'Boyle, 1994 This collection of seven essays a project of the Association for Social Economics challenges the conventional paradigm of mainstream economics which rejects human need as a viable concept and seeks to establish a new paradigm grounded in human material need under its two distinct aspects physical need and the need for work as such In the Introduction John B Davis maintains that mainstream economic theory denies that needs can be distinguished from wants and so does not recognize the importance of this dimension of economic life He argues that it is virtually impossible to discuss the economy without addressing the individuals families and communities whose needs go unmet and who thus become the focus of social and economic policies The contributors establish in their essays a philosophical and methodological foundation to explain the nature of need and its centrality to economics They present a new socioeconomic paradigm based on human material need which is presented in the context of the three principles that organize economic affairs competition cooperation and intervention and which is underlaid by the social values of freedom community and equality Essayists strive to incorporate the duality of human nature the recognition that every human being is at once an individual and a social being in their definition of human physical need and the need for work They further address unmet individual material need through private and public sector remedies The essays include Need as a Mode of Discourse by Warren J Samuels The Person and the Social Economy Needs Values and Principles by Peter L Danner Human Physical Need A Concept That Is Both Absolute and Relative by Edward J O Boyle Government Participation to Address Human Material Need by Anthony E Scaperlanda The Need for Work as Such Self Expression and Belonging by Edward J O Boyle Social Management and the Self Managed Firm by Severyn T Bruyn and Reconstruction of Mainstream Economics and the Market Economy by John B Davis and Edward J O Boyle
