Caves and the Ancient Greek Mind Yulia Ustinova,2009-02-12 Caves and the Ancient Greek Mind analyses techniques of searching for ultimate wisdom in ancient Greece The Greeks perceived mental experiences of exceptional intensity as resulting from divine intervention They believed that to share in the immortals knowledge one had to liberate the soul from the burden of the mortal body by attaining an altered state of consciousness that is by merging with a superhuman being or through possession by a deity These states were often attained by inspired mediums impresarios of the gods prophets poets and sages who descended into caves or underground chambers Yulia Ustinova juxtaposes ancient testimonies with the results of modern neuropsychological research This novel approach enables an examination of religious phenomena not only from the outside but also from the inside it penetrates the consciousness of people who were engaged in the vision quest and demonstrates that the darkness of the caves provided conditions vital for their activities
