## Light And Life:

*Light and Life* Michael Gross, 2002 There would be no life on Earth without light from the Sun and life would not be as highly evolved as it is had it not made the best use of light's energy and information for using photosynthesis biological clocks and vision In *Light and Life* Michael Gross explores six major aspects of the complex and fascinating interplay between light and life ranging from the mythical role of the Sun in ancient cultures to the latest advances in scientific research covering photosynthesis bioluminescence vision perception and biological clocks Light like no other physical phenomenon is linked in a wide variety of ways with the biological phenomenon of life We can read this page because light is reflected from it and carries the information to the retina the oxygen we breathe was produced by photosynthesis our sense of alertness relies on our biological clock set using the cues of light and dark Michael Gross explores the symbiotic relationship of light and life in this intriguing and entertaining book Starting with astronomy and our relationship with the Sun and dependence on photosynthesis he then turns to some of the stranger outcomes of the relationship bioluminescent creatures and their evolutionary significance Finally he looks at the influence of light on biological time keeping the focus of much current scientific research Life would not be here without light and it would not have evolved as it has done had it not made the best possible use of light's energy and information content for using photosynthesis biological clocks and vision This book explores all these aspects of the fascinating interplay of these two phenomena in a lively manner using many intriguing examples

*Light and Life in the Sea* Marine Biological Association of the United Kingdom, 1990-05-17 Without light there would be no life in the sea Since the seas were the cradle for the evolution of all life forms the theme of this book is central to our understanding of the interaction between living organisms and their environments To express the breadth of research in this area leading experts in topics as diverse as satellite imagery and molecular biology have contributed to this collection of essays on light and life in the sea first published in 1990 Intended for all with an interest in the marine environment this book aims to present the reader with a sampler of the exciting research that is underway and to provide an introduction to its broad compass
