Personality Research, Methods, and Theory Patrick E. Shrout, Susan T. Fiske, 2014-04-04 Donald W Fiske's professional life and collaborations are themselves a textbook in the development of the field of personality From the field's early origins in personnel selection rating accuracy and psychotherapy outcomes to its current status of theoretical and methodological maturity complete with mid life crises the field has been fundamentally changed by Fiske's work and the changes have influenced generations of scholars This festschrift is a celebration of Fiske's impact but not merely of his impact on the history of personality research Instead the volume focuses on ongoing debates and issues that have been framed or influenced by Fiske's work The festschrift's three sections are organized around three themes in Fiske's writings themes that also correspond to three periods in his career This volume examines current thinking about what can be known about personality how constructs relevant to personality psychology are best measured and how to approach specific research problems in personality and related fields The contributors create an eminent cross section of the development and current status of personality methods In addition to Fiske's eminent contemporaries the contributors to this volume include Fiske's former students collaborators and his two children both of whom are behavioral scientists The accomplishments of his students colleagues and children testify to the range of psychologists who have benefited from his scholarly and practical wisdom This collection is a valuable textbook for an advanced graduate course as well as appealing as a scholarly resource Many of the contributors are renowned psychological leaders who have made available their latest original thoughts The book concludes with an essay by Fiske offering his perspective on the central themes behavioral and social science metatheory methods and strategies

Eclipsing Binary Stars: Modeling and Analysis Josef Kallrath, Eugene F. Milone, 2009-08-14 Have you ever stopped at a construction project on the way to your office and the day's astrophysics Remember the other onlookers folks just enjoying the spectacle as we all do in following developments away from our areas of active work We are excited and thrilled when the Hubble Space Telescope discovers an Einstein Cross when the marvelous pulsars enter our lives and when computer scientists put a little box on our desk that outperforms yesterday's giant machines We are free to make use of such achievements and we respect the imagination and discipline needed to bring them about just as onlookers respect the abilities and planning needed to create a building they may later use After all each of us contributes in our own areas as best as we can In addition to the serious onlookers there will be passersby who take only a casual look at the site They may use the building later but have little or no interest in its construction and give no thought to the resources needed to bring it to completion Upon arriving at work those persons write astronomy and astrophysics books at various levels in which they must say something about close binary stars Usually a page or two will do and the emphasis is on the MLR mass luminosity radius data obtained only from binaries
