

Relativistic Addition of Velocities

- The result of special relativity for the addition of velocities is

$$v_{OA} = \frac{v_{OT} + v_{TA}}{1 + \frac{v_{OT}v_{TA}}{c^2}}$$

- The velocities are:
 - v_{OT} – the velocity of an object relative to an observer
 - v_{TA} – the velocity of one observer relative to a second observer
 - v_{OA} – the velocity of the object relative to the second observer

Light Velocity Relativity 3ed:

Special Relativity and Motions Faster than Light Moses Fayngold, 2008-09-08 While the theory of special relativity is often associated with the idea of traveling faster than light this book shows that in all these cases subtle forces of nature conspire to prevent these motions being harnessed to send signals faster than the speed of light The author tackles these topics both conceptually with minimal or no mathematics and quantitatively making use of numerous illustrations to clarify the discussion The result is a joy to read for both scientists familiar with the subject and laypeople wishing to understand something of special relativity

Quantum Non-Locality and Relativity Tim Maudlin, 2011-05-06 The third edition of Quantum Non Locality and Relativity has been carefully updated to reflect significant developments including a new chapter covering important recent work in the foundations of physics A new edition of the premier philosophical study of Bell s Theorem and its implication for the relativistic account of space and time Discusses Roderich Tumulka s explicit relativistic theory that can reproduce the quantum mechanical violation of Bell s inequality Discusses the Free Will Theorem of John Conway and Simon Kochen Introduces philosophers to the relevant physics and demonstrates how philosophical analysis can help inform physics

Karl Popper, Science and Enlightenment Nicholas Maxwell, 2017-09-26 Here is an idea that just might save the world It is that science properly understood provides us with the methodological key to the salvation of humanity A version of this idea can be found in the works of Karl Popper Famously Popper argued that science cannot verify theories but can only refute them and this is how science makes progress Scientists are forced to think up something better and it is this according to Popper that drives science forward But Nicholas Maxwell finds a flaw in this line of argument Physicists only ever accept theories that are unified theories that depict the same laws applying to the range of phenomena to which the theory applies even though many other empirically more successful disunified theories are always available This means that science makes a questionable assumption about the universe namely that all disunified theories are false Without some such presupposition as this the whole empirical method of science breaks down By proposing a new conception of scientific methodology which can be applied to all worthwhile human endeavours with problematic aims Maxwell argues for a revolution in academic inquiry to help humanity make progress towards a better more civilized and enlightened world

Time and Economics Željko Rohatinski,2017-10-09 This book links the philosophical perception of time and Einstein's theory of special relativity to economic processes showing that the phenomena of time dilation and length contraction seen in physics can be identified within and adapted to an economic framework The author expands on Marx's model of reproduction with the additional variable of time which is represented as a relative or functional category In addition to allowing a more precise understanding of both static and dynamic relations between economic systems this concept examines approaches to time proposed by Smith Marshall and Keynes and challenges the equilibrium and disequilibrium economic models Rohatinski suggests that by understanding the differences in economic activity perceived across different time periods we are better able to influence that activity at micro and macroeconomic levels Reason and Wonder Dave Pruett,2012-05-08 In this enlightening and provocative exploration Dave Pruett sets out a revolutionary new understanding of our place in the universe one that reconciles the rational demands of science with the deeper tugs of spirituality Defining a moment in human self awareness four centuries in the making Reason and Wonder A Copernican Revolution in Science and Spirit offers a way to move beyond the either/or choice of reason versus intuition a dichotomy that ultimately leaves either the mind or the heart wanting In doing so it seeks to resolve an age old conflict at the root of much human dysfunction including today's global ecological crisis An outgrowth of C David Pruett's breakthrough undergraduate honors course From Black Elk to Black Holes Shaping Myth for a New Millennium Reason and Wonder embraces the insights of modern science and the wisdom of spiritual traditions to re-enchant the universe The new myth of meaning unfolds as the story of three successive Copernican revolutions cosmological biological and spiritual offers an expansive view of human potential as revolutionary as the work of Copernicus Galileo and Darwin
