Patrick McCray, 2020-10-20 The creative collaborations of engineers artists scientists and curators over the past fifty years Artwork as opposed to experiment Engineer versus artist We often see two different cultural realms separated by impervious walls But some fifty years ago the borders between technology and art began to be breached In this book W Patrick McCray shows how in this era artists eagerly collaborated with engineers and scientists to explore new technologies and create visually and sonically compelling multimedia works This art emerged from corporate laboratories artists studios publishing houses art galleries and university campuses Many of the biggest stars of the art world Robert Rauschenberg Yvonne Rainer Andy Warhol Carolee Schneemann and John Cage participated but the technologists who contributed essential expertise and aesthetic input often went unrecognized Coming from diverse personal backgrounds this roster of engineers and scientists includes Frank J Malina the American rocket pioneer turned kinetic artist who launched the art science journal Leonardo and Swedish born engineer Billy Kliver who established the group Experiments in Art and Technology E A T At schools ranging from MIT to Caltech engineers engaged with such figures as artist Gyorgy Kepes and celebrity curator Maurice Tuchman Today we are in the midst of a new surge of corporate and academic promotion of projects and programs combining art technology and science Making Art Work reveals how artists and technologists have continually constructed

Pooler,2013-02-04 Conceptual art in the Western world is in crisis That is the view of many people who are disillusioned with what they regard as its attention seeking antics where artists themselves have proudly proclaimed the death of art Why has art been on this road to destruction and how did it get there How does one make sense of the bewildering complexity of Conceptual art and how does one extract meaning from its diverse and sometimes bizarre manifestations This predicament needs explanation and an exploration of the theoretical underpinnings of modern and contemporary art and a means to evaluate it This book starts with a summarised overview of the major art movements since the beginning of the twentieth century a tracing of the extraordinary journey that art has followed in modern times The next part considers contemporary art movements to explore whether they have value and how that value can be determined Are the activities that take place in the name of art actually art Or as some would have it is it a gigantic sham manipulated by clowns to make a trap for fools To some it is an outrage that modern and contemporary artists can splash paint around quickly and freely with a modicum of skill or assemble a range of found objects and regard themselves as gifted and creative artists Others see this as a new forward rolling wave with art at last released from the suffocation and restrictions of the past The rules have been cast aside There are fresh ways of exploring and seeing the world and expressing it freely The world is constantly changing and art must change with it Modern art has followed a long journey Traditions have been largely cast aside and replaced with an unceasing search for the new Our apparent progress is now being questioned Where do we go from here Are we on the right road The second half of this book discusses how we can make sense of contemporary art and assign value to an artwork Traditional painting and sculpture have physical limits Conceptual art does not This is a new freedom but is it freedom for art or freedom from art ***Monthly Review of the U.S. Bureau of Labor Statistics*** ,1916 *Beautiful Agitation* Anneka

Lenssen,2020-09-29 In modern Syria a contested territory at the intersection of differing regimes of political representation artists ventured to develop strikingly new kinds of painting to link their images to life forces and agitated energies Examining the works of artists Kahlil Gibran Adham Ismail and Fateh al Moudarres *Beautiful Agitation* explores how painters in Syria activated the mutability of form to rethink relationships of figure to ground outward appearance to inner presence and self to world Drawing on archival materials in Syria and beyond Anneka Lenssen reveals new trajectories of painterly practice in a twentieth century defined by shifting media technologies moving populations and the imposition of violently enforced nation state borders The result is a study of Arab modernism that foregrounds rather than occludes efforts to agitate against imposed identities and intersubjective relations ***Monthly Labor Review*** ,1916 *Working Like a Homosexual* Matthew
