**Light from Light** Gerald S. J. O'Collins, Mary Ann Meyers, 2012-01-31 In this volume renowned scientists and theologians discuss the concept of light as understood by modern physics and employed by biblical and patristic writers Light from Light deepens readers understanding of light as posited by recent cosmological and physical theories drawing connections with light as a theological metaphor Striking glimpses into new scientific developments offer additional insight and interest Contributors Markus Aspelmeyer John Behr Marco Bersanelli Robert W Boyd David Brown Robert Dodaro Michael Heller George Hunsinger Mary Ann Meyers Gerald O Collins John Polkinghorne Andrew M Steane Kathryn E Tanner Kallistos Ware Metropolitan of Diokleia Anton Zeilinger

**Light from Light** Louis K. Dupré, James A. Wiseman, 2001 In this revised edition of a longtime bestselling anthology of Christian mysticism editors Louis Dupre and James Wiseman bring together selections from the writings of twenty three of the most important Christian mystics from Origen of Alexandria in the third century to Thomas Merton in the twentieth This edition retains most of the authors included in the first addition but has replaced some authors from that edition with ones that will be of greater interest to readers today e g Francis and Clare of Assisi Francis de Sales and Jane de Chantal and Evelyn Underhill A general introduction discusses the place of mysticism within the Christian life as a whole while individual chapter introductions place the mystical writers in their historical context and relate their works to others in the anthology In addition the editors have completely updated the bibliographies at the end of each chapter Students and teachers of spirituality as well as persons interested in their own spiritual growth will welcome this popular revised resource because it makes readily available in one volume major works by important Christian mystical writers Like its predecessor it is sure to be welcomed in the academic world and spiritual and devotional circles

Life from Light Michael Werner, Thomas Stockli, 2012-07-09 In 1923 Therese Neumann a nun in Southern Germany stopped eating and drinking Apart from the wafer given at Mass she did not eat again despite living for a further 35 years Other similar cases have been reported over the years often holy men from the East and have taken on something of a mythical status However they remain obscure enough to be brushed aside by modern scientists Michael Werner presents a new type of challenge to sceptics A fit family man in his 50s he has a doctorate in Chemistry and is the managing director of a research institute in Switzerland In this remarkable account he describes how he stopped eating in 2001 and has survived perfectly well without food ever since In fact he claims never to have felt better Unlike the people who have achieved this feat in the past he is an ordinary man who lives a full and active life Michael Werner has an open challenge to all scientists Test me using all the scientific monitoring and data you wish In fact he describes one such test here in which he was kept without food in a strictly monitored environment for ten days Werner also describes in detail how and why he came to give up food and what his life is like without it This book features other reports from those who have attempted to follow this way of life as well as supplementary material on possible scientific explanations of how one could live on light

**Into Darkness** Stephen Mehler, 2014-06-16 Building on the esoteric information first revealed in Land of Osiris this exciting book presents more of Abd El Hakim's oral traditions with radical new interpretations of how religion evolved in prehistoric and dynastic Khemit or Egypt. Have popular modern religions developed out of practices in ancient Egypt? Did religion in Egypt represent only a shadow of the spiritual practices of prehistoric people? Have the Western Mystery Schools such as the Rosicrucian Order evolved from these ancient systems? Author Mehler explores the teachings of the King Akhenaten and the real Moses, the true identity of the Hyksos and Akhenaten's connections to The Exodus, Judaism and the Rosicrucian Order. Here for the first time in the West are the spiritual teachings of the ancient Khemitians, the foundation for the coming new cycle of consciousness. The Awakening more *Drawing the Light from Within* Judith Cornell, 1997-01-01 Describes the importance of visualization and suggests eleven techniques to develop one's creativity, inner vision and self-esteem **Light from the Angels** Hallie Deering, 1997-06-01 Angelic Technology Manifesting on Earth. Now those who could not attend the Angel Academy in person have a unique opportunity to learn about major metaphysical topics from the Angels themselves. Light From the Angels discusses difficult subjects in the angels' own precise, easy-to-understand language. Many formidable concepts that have been hazy for most students of metaphysics will suddenly become crystal clear and meaningful as the angels deftly show you how life's intricate complex puzzle pieces fit easily together. Whether you are a professional healer, a channel, a psychic or just simply interested in advanced metaphysics, the Divine Mother and the Rose Angels will take you by the hand and lead you down exciting new pathways of self-discovery and adventure. Their methods for inner transformation are practical, appealing and enlightening; you owe it to yourself to make them a permanent part of your spiritual life.

*Saints and the Enlightened: Light from another Dimension*, **Streams of Light from a Heart Broken** Julie Grant, 2022-03-27 After Julie Grant's husband John died abruptly, she found herself in that allegorical valley and discovered her faith was the only source of light that could pierce the darkness. In *Streams of Light from a Heart Broken*, she narrates the story of her journey. Throughout this devotional, Grant acknowledges that grief is hard. There is absolutely no part of grieving that is remotely pleasant. It is not a systematic box-ticking list of emotions you proceed through to completion. Grieving like living is a process determined by the choices you make on the journey, and there are always choices. *Streams of Light from a Heart Broken* addresses the questions: Where do you turn when the darkness overwhelms? Who do you turn to? How do you extend grace when words meant for comfort leave you deeply wounded? Is forward momentum even possible? Through her experiences, Grant hopes her words encourage others as they seek the brightest light in their darkest night. Light from the West. Or, the Cornish Parochial Visitor H. A. Watson,2016-02-02 Light begins at Stonehenge where crowds cheer a solstice sunrise After sampling myths explaining First Light the story moves on to early philosophers queries then through the centuries from Buddhist temples to Biblical scripture when light was the soul of the divine Battling darkness and despair Gothic architects crafted radiant cathedrals while Dante dreamed a heaven of pure light Later following Leonardo s advice Renaissance artists learned to capture light on canvas During the Scientific Revolution Galileo gathered light in his telescope Descartes measured the rainbow and Newton used prisms to solidify the science of optics But even after Newton light was an enigma Particle or wave Did it flow through an invisible ether Through the age of Edison and into the age of lasers Light reveals how light sparked new wonders relativity quantum electrodynamics fiber optics and more Although lasers now perform everyday miracles light retains its eternal allure For the rest of my life Einstein said I will reflect on what light is Light explores and celebrates such curiosity

**Cosmology of Light** Pravir Malik,2018-02-14 This book is about Light It is a story of Light from an apparent beginning to the present and then also a story of that condition that transcends Time and is hence beginning less But it is more too It is a book about the central place of Light in all things Being so it is a cosmology it suggests a nature of the universe in which all that is is of Light Hence this book describes a Cosmology of Light But the medium chosen to express this nature is mathematics Specifically as will be discovered there is a particular symmetrical function based mathematics that is formulated to express the nature of cosmos The starting point is Light itself and all that is seen to exist is as a play of Light Hence Light is presumed to exist in some native state characterized by an infinite speed It chooses or experiments to project its fundamental nature at some reduced speed that is experienced as  $c$  186 000 miles per second in vacuum that has a profound effect on the experienced nature of reality This projection precipitates a Big Bang A mathematical state in which quanta becomes a door way to multiple layers of Light comes into existence at that moment and is captured by a seed equation that is positioned as being always fully present in any and everything Hence all of Light conspires to create anything and everything no matter how different from Light it may seem Hence there is a fundamental symmetry to everything no matter how different it may appear in form The seed equation is structured by a four foldness anchored on implicit properties in Light This four foldness is the cornerstone of the constructed function based mathematics This equation referred to as the Light Space Time Emergence equation contains all possibility and will indicate how all layers of known existence have emerged The same equation essentially being used for anything in existence points to the fundamental mathematical symmetry of all things Hence from an initial fourfold space time energy gravity expression through the electromagnetic field quantum particles atoms cells and then human attributes and dynamics to complex organizations and countries culminating in a possible sustainable global civilization the relationship of all things to this underlying seed equation and all things as the seed equation will be emphasized But it will also be seen that Love is the compelling dynamic of projected four foldness and appears to be the magician that causes the separated fourfold powers in Light to reintegrate to

make materially real the compelling nature of oneness that Light and all its creatures in reality are In the scheme of things the human placed at the middle of sixty orders of cosmic magnitude ranging from the minute Planck length to astronomical gigaparsecs appears to have a critical role in the continuing unfolding of the Cosmos It is only by transcending smallness and becoming one with the magician to so enter into the very dynamic of Love that the universe can continue on its ever complexifying ever more beautiful journey of increasing functional richness It is only if humans so unite with the secret of Light that truer individuality truer knowledge truer power can emerge and the very material process of space time energy gravity quantization can be activated to create foundations of super matter that in the scheme of things is the compelling crystallization of the infinity in Light reformulating micro and macro orders of magnitude to change the nature of Cosmos

**Arians and Vandals of the 4th-6th Centuries** John R. C. Martyn, David O'Brien, 2020-12-15 As a background to this study of the Arians and Vandals in North Africa and their impact on the Catholic Church three books have been written recently by John Martyn investigating the same period late sixth century and the same country They are firstly Pope Gregory's Letters published with commentary and translation by P I M S three vols 2 2004 see introduction pp 32 42 and epp 1 74 2 36 and 11 7 and for the Manichean heresy see epp 2 31 5 7 and 6 14 Next the Life of Saint Gregory bishop of Agrigento published with his commentary and translation by Edwin Mellen 2004 is set in North Africa in chapters 7 30 and also covers the main schisms of that time Finally in a book on Saint Leander Archbishop of Seville soon to be published by Lexington Books in Maryland he shows that Leander's parents and baby sister were forced to flee from their home in Cartagena to Carthage from where the Vandals had recently been expelled Note also his review of *L'Afrique Vandale et Byzantine Ie Partie* Paris 2002 which was published in *Parergon* 21 1 2004 pp 155 157 and involved a study of the same schisms history and archaeology of North Africa

Herrstrom, 2017-09-26 This book is an interdisciplinary synthesis and interpretation about the experience of light as revealed in a wide range of art and literature from Paleolithic to Roman times Humanistic in spirit and in its handling of facts it marshals a substantial body of scholarship to develop an explication of light as a central even dramatic reality of human existence and experience in diverse cultural settings David S Herrstrom underscores our intimacy with light not only its

constant presence in our life but its insinuating character Focusing on our encounters with light and ways of making sense of these this book is concerned with the personal and cultural impact of light exploring our resistance to and acceptance of light Its approach is unique The book s true subject is the individual s relationship with light rather than the investigation of light s essential nature It tells the story of light seducing individuals down through the ages Consequently it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light optical science but rather with subjective reactions to it as reflected in art Paleolithic through Roman architecture Egyptian Grecian Roman mythology and religion Paleolithic Egyptian and literature e g Akhenaten Plato Aeschylus Lucretius John the Evangelist Plotinus and Augustine This book celebrates the complexity of our relation to light s character No individual experience of light is truer than any other none improves on any previous experience of light s tidal pull on us And the wondrous variety of these encounters has yielded a richly layered tapestry of human experience By its broad scope and interdisciplinary approach this pioneering book is without precedent

From Edison To Leds: The Science And Story Of Light Sources Faiz Rahman, 2023-04-14 From the earliest eras light has always been a fascinating resource for humankind From pre historic to modern times man evolved while harnessing this source of illumination through a variety of techniques This book retells the stories behind the technologies interesting historical anecdotes and fascinating scientific facts behind the various modern methods for generating light and illuminating the world From the groundbreaking inventions of Edison and Swan to the revolutionary advancements in laser technology to the advent of the energy efficient LEDs and more While the main focus of this narrative is on sources of visible light it also delves into several devices that produce invisible radiation as a significant part of centuries worth of innovation Offering a thorough exploration of familiar and unusual light sources this comprehensive book encompasses historical and technical viewpoints By providing this holistic approach readers can gain a deeper understanding of modern advancements in the field as they relate to historical origins and applications It is a valuable resource for anyone interested in optical sciences particularly those involved in the generation detection or utilization of electromagnetic radiation
