Democratic Education in Practice Matthew Knoester,2015-04-25 The Mission Hill

School founded by MacArthur Award winner Deborah Meier and colleagues in 1997 is a small public school that has rethought almost everything about the process of teaching and learning. Beyond richly describing and evaluating this high achieving school, the author argues that democratic education is increasingly difficult in this era of testing and standardization and that a school such as Mission Hill must be continually thoughtful, innovative, and courageous in counteracting systemic inequality. This in-depth examination is essential reading for anyone interested in how to better understand seemingly intractable problems related to urban public education in the United States. Book Features: An exemplary model of democratic education that shows the inner workings of a largely teacher-governed school. A rare example of an urban school implementing Dewey-influenced progressive pedagogy. In-depth descriptions of an anti-racist and culturally relevant pedagogy and curriculum. A close examination of successful practices including shared decision-making, intensive problem-solving, and looking at student work.

Matthew Knoester is a National Board Certified Teacher and former teacher at the Mission Hill School in Boston. He received his Ph.D. in Curriculum and Instruction from the University of Wisconsin-Madison and is currently Assistant Professor of Education at the University of Evansville. Matthew Knoester has done us an enormous favor by showing us in detail what could be one example of how schools can be the building blocks for democracy, recreating community for all to taste, feel, hear, and see.

From the Foreword by Deborah W. Meier: This is exactly the kind of book that is so necessary at this time. Schools can be respectful, responsive, and caring places. Matthew Knoester gives us a detailed picture of such a school. If more people would read books such as this, the national debate on education would be all the better for it.

Michael W. Apple, John Bascom Professor of Curriculum and Instruction and Educational Policy Studies, University of Wisconsin-Madison: Knoester's account of the Mission Hill School captures the habits of mind needed if public schools are to be truly democratic in spirit and in practice, centered on the children and, as Deborah Meier so powerfully advocates, protected from those policies and social forces that accept and perpetuate disengagement and inequality in our children's education.

Linda McSpadden McNeil, Professor of Education, Rice University: author of *Contradictions of School Reform*. To those who have never seen the Mission Hill School in Boston, it may sound like a magical place. The good news is that it is real, and Knoester shows us through his compelling narrative how and why they have been able to achieve so much. For educators, students, and parents, this book will be a source of inspiration. At a time when our policymakers and many so-called reformers are actively undermining support for public education, this important book will serve as a reminder that we can do a much better job at educating all children.

Pedro Noguera, Executive Director, Metropolitan Center for Urban Education, New York University: [Advisory in Urban High Schools](#)

K. Phillippo, 2013-07-31

Kate Phillippo evaluates the practice of having teachers also serve as advisors, tasked with providing social-emotional support to students. Through an in-depth survey of teacher advisors at three different urban high schools, she examines the different ways in which advisors interpret and carry out the role and the outcomes for students. *Why Half of Teachers Leave the*

Classroom Carol R. Rinke, 2014-02-02 The statistics are familiar almost 50% of new teachers leave the profession within their first five years in the classroom The challenge of recruiting and retaining teachers carries high costs for today's schools and students This book uncovers some of the reasons behind the elevated attrition rates in the field of education through a long term study of beginning teachers in one urban school district Drawing upon research conducted over a seven year period this book sheds light upon the role that teachers' intentions play in shaping their later career paths It also shares the deeply personal and professional journeys of teachers who stayed teachers who shifted into education related positions and teachers who left the field altogether Through eight in depth case studies this book clarifies the factors influencing teachers' career paths and depicts the toll that teacher attrition takes on the teachers themselves Finally it makes an argument for placing teachers' voices clearly at their center of their own career development as a way to enhance autonomy satisfaction and ultimately career longevity
