Connah,2006-03-15 Buildings speak volumes not just about their occupants or owners but about the countries in which they exist From colonnades to paving stones the architecture of any building does more than simply date the structure it celebrates the spirit of a people and a nation Roger Connah's latest book Finland explores the culture and democratic spirit of a country whose buildings carry the indelible markings of Finland's political and physical climate Nearly all of the country's buildings were constructed after 1917 when Finland gained its independence from Russia The resulting architecture often springing from hugely popular public competitions is emphatically democratic in structure and usage Finland's extreme northern latitudes for their part have given rise to buildings with an acute sensitivity to the physical environment and to the delicate interplay of light and shadow From museums to schools to subsidized housing developments Connah's Finland is an important survey of the country's architecture Fully illustrated and with detailed examinations of many of the Finnish master architects including Alvar Aalto it is also a valuable contribution to the studies of modern architecture and Nordic history
