Firm 1st Edition:

Corporate Finance and Governance in Stakeholder Society Shinichi Hirota, 2015-02-11 This book develops a new framework the stakeholder model that helps to understand corporate finance and governance in modern society where the sources of people's happiness have shifted from monetary to non-monetary factors. The book takes a more comprehensive approach than is typically found in the standard economics and finance literature by explicitly incorporating both the monetary and non-monetary interests of stakeholders and by examining the value creation of corporations from a much broader perspective. Specifically, the book addresses contemporary issues concerning corporate finance and governance worldwide including: How should we define corporate value in stakeholder society? What is the role of modern corporations? What are the principles underlying corporate financing decisions? To what extent should shareholder rights be enhanced? What determines the effectiveness of a company's board of directors? What missions do firms set out and what is the role of mission statements? How can we understand the diversity of financial and governance systems among different countries? What legal and institutional reforms enhance or diminish corporate value in stakeholder society? The book will answer these questions theoretically and empirically.

Theory of the Firm H. Albach, K. Brockhoff, E. Eymann, P. Jungen, M. Steven, A. Luhmer, 2012-12-06 This book has an objective and a focus. It provides the reader with an in-depth acquaintance with the theory of the firm developed by Erich Gutenberg, an insight into a coherent body of current German research in the theory of the firm. The book is divided into two parts. The first part lays the foundations. It presents Gutenberg's theory of the firm to the English-speaking reader. Considering the great importance that Erich Gutenberg has had in Germany and taking into consideration the impact that the translations of his path-breaking three volumes *Principles of Management* have had in France, the Spanish-speaking countries, and in Japan, it was felt that it was necessary on the occasion of his 100th anniversary to present a concise summary of his contributions to the theory of the firm to an English-speaking scientific community. Six papers present Gutenberg's theory in the light of the theoretical advances that he stimulated as well as in the framework of other theoretical developments like capital market theory, transaction cost theory, principal agent theory, and contract theory. The papers show that Gutenberg's theory is highly relevant for theory and highly influential in the practice of management.

The Oxford Handbook of Industrial Hubs and Economic Development Arkebe Oqubay, Justin Yifu Lin, 2020-07-23 Industrialization supported by industrial hubs has been widely associated with structural transformation and catch up. But while the direct economic benefits of industrial hubs are significant, their value lies first and foremost in their contribution as incubators of industrialization, production, and technological capability and innovation. *The Oxford Handbook of Industrial Hubs and Economic Development* adopts an interdisciplinary approach to examine the conceptual underpinnings, review empirical evidence of regions and economies, and extract pertinent lessons for policy researchers and practitioners on the key drivers of success and failure for industrial hubs. This Handbook illustrates the diverse and complex nature of industrial

hubs and shows how they promote industrialization economic structural transformation and technological catch up It explores the implications of emerging issues and trends such as environmental protection and sustainability technological advancement shifts in the global economy and urbanization

Perspectives on Strategic Change Luca Zan, Stefano Zambon, Andrew M. Pettigrew, 2007-09-04 Luca Zan Stefano Zambon Andrew M Pettigrew This book has developed from an international research workshop organized by the Dipartimento di Economia e Direzione Aziendale University of Venice and the Centre for Corporate Strategy and Change Warwick Business School University of Warwick The purpose of the workshop was to foster the growth of a European network of scholars and to help create a European perspective in studying strategic change The ten chapters in this book were first presented in Venice in May 1991 and have been substantially revised since then The ten commentaries on the chapters are in most cases substantial developments of the oral responses made at the workshop as indeed is the final review chapter by Andrew Van de Ven The theme of this book the study of strategic change processes remains as theoretically alive and empirically real in the 1990s as it did in the 1980s For many organizations in the European and North American context the 1980s was an era of radical change In this respect there is a wide array of examples Structural changes in old industries such as coal shipbuilding steel and heavy engineering led to a great employment loss and the impoverishment of certain regional economies that had remained dependent on those industries But it was not just the old industries that X INTRODUCTION experienced major change during the 1980s
