Focus On Sociology A Of Sociological Readings:

Focus on Sociology Arnold Orville Olson, Sushil K. Usman, 1970
Usman, 1983 **Focus Groups in Social Research** Michael Bloor, 2001-03-08 Focus Groups in Social Research addresses the key issues and practical requirements of the social researcher using focus groups Postcolonial Reconstruction: A Sociological Reading of Octavio Paz Oliver Kozlarek, 2016-08-23 This book presents a close reading of the work of the Mexican writer and Nobel Prize Laureate Octavio Paz It does so from the specific perspective of sociology and the more general perspective of the social sciences The book identifies opportunities for relating Paz sociological ideas to contemporary debates arguing that Paz sociology is linked very closely to his assessment of what could be called the post colonial condition that Mexico has been experiencing The book thus advances the understanding of the differences between post colonial experiences in Latin America and those of other areas of the world In addition to revealing Paz sociology the book focuses on Modernity and examines Paz critique of Modernity and his project of Modernity It shows that a close examination of the works of Octavio Paz helps redefine Modernity from a Latin American perspective as an experience in which the global and local are intertwined and helps to point in the direction of a new kind of humanism **A Case for the Case Study** Joe R. Feagin, Anthony M. Orum, Gideon Sjoberg, 2016-08-01 Since the end of World War II social science research has become increasingly quantitative in nature A Case for the Case Study provides a rationale for an alternative to quantitative research the close investigation of single instances of social phenomena The first section of the book contains an overview of the central methodological issues involved in the use of the case study method Then well known scholars describe how they undertook case study research in order to understand changes in church involvement city life gender roles white collar crimes family structure homelessness and other types of social experience Each contributor confronts several key questions What does the case study tell us that other approaches cannot To what extent can one generalize from the study of a single case or of a highly limited set of cases Does case study work provide the basis for postulating broad principles of social structure and behavior The answers vary but the consensus is that the opportunity to examine certain kinds of social phenomena in depth enables social scientists to advance greatly our empirical understanding of social life The contributors are Leon Anderson Howard M Bahr Theodore Caplow Joe R Feagin Gilbert Geis Gerald Handel Anthony M Orum Andree F Sjoberg Gideon Sjoberg David A Snow Ted R Vaughan R Stephen Warner Christine L Williams and Norma Williams **Handbook of Classical Sociological Theory** Seth Abrutyn, Omar Lizardo, 2021-11-01 This is the first handbook focussing on classical social theory It offers extensive discussions of debates arguments and discussions in classical theory and how they have informed contemporary sociological theory The book pushes against the conventional classical theory pedagogy which often focused on single theorists and their contributions and looks at isolating themes capturing the essence of the interest of classical theorists that seem to have relevance to modern research questions and

theoretical traditions This book presents new approaches to thinking about theory in relationship to sociological methods

Course Syllabi in Faculties of Education André Elias

Mazawi, Michelle Stack, 2020-06-11 Course Syllabi in Faculties of Education problematizes one of the least researched phenomena in teacher education the design of course syllabi using critical and decolonial approaches This book looks at the struggles that scholars policy makers and educators from a diverse range of countries including Australia Canada India Iran Palestine Qatar Saudi Arabia the USA and Zambia face as they design course syllabi in higher education settings The chapter authors argue that course syllabi are political constructions representing intense sites of struggles over visions of teacher education and visions of society As such they are deeply immersed in what Walter Mignolo calls the geopolitics of knowledge Authors also show how syllabi have become akin to contractual documents that define relations between instructors and students Based on a set of empirically grounded studies that are compared and contrasted the chapters offer a clearer picture of how course syllabi function within distinct socio political economic and historical contexts of practice and teacher education

Sociology, Phenomenology and Marxian Analysis Barry Smart, 2013-10-15 Sociology is an established academic discipline but there has been continuing debate over

its status as a science and the nature of its subject matter This led to the emergence of a phenomenological sociology and to critiques of positivist sociology This critical reappraisal of the relevance of Marxian analysis for a science of society shows how these developments within sociology have had their counterpart in Marxism The author analyses the status of Marx's work and the Marxist tradition in sociology He focuses upon those concerns which are common to both Marxian analysis and sociology the question of subjectivity the nature of social reality and the dialectical relationship of the doing or practice of a science of society to the social world within which such social analyses are situated Originally published in 1976 Reading Rate and Comprehension National Assessment of Educational Progress (Project), Donald R.
