Histories of Crime Anne-Marie Kilday, David Nash, 2010-06-03 Providing a rounded and coherent history of crime and the law spanning the past 400 years *Histories of Crime* explores the evolution of attitudes towards crime and criminality over time Bringing together contributions from internationally acknowledged experts the book highlights themes current issues and key debates in the history of deviance and bad behaviour including Marital cruelty and adultery Infanticide Murder The underworld Blasphemy and moral crimes Fraud and white collar crime The death penalty and punishment Individual case studies of violent and non violent crime are used to explore the human means and motives behind criminal practice Through these the book illuminates society's wider attitudes and fears about criminal behaviour and the way in which these influence the law and legal system over time This fascinating book is essential reading for students and teachers of history sociology and criminology as well as anyone interested in Britain's criminal past *Burglars and Bobbies* Gregory J.

Durstun, 2012-11-30 The early decades of the nineteenth century witnessed an apparent deterioration in public order and security in the London area This continued to worsen until the middle of the century During this period the Metropolitan Police was established ostensibly transforming policing in the capital By the 1860s crime seemed to be falling rapidly and continued to do so until the end of the century so that it was no longer normally a subject that occasioned acute political concern This book examines the reality of crime levels within the Metropolis the extent to which they differed from public perception and the manner in which they changed over time It considers how the police might have had an impact on public security after 1829 the use of the broken windows paradigm for crime control in an historical context and the extent to which the police can take credit for the post 1860 improvement in offending levels and order However it also discusses other factors both economic and social that might explain these developments At the same time the book charts the general history and development of urban policing in London during the nineteenth century the complicated and sometimes competing mixture of political and financial concerns operational priorities public and expert opinion that it reflected and the controversies that it engendered In particular it discusses the traditional form of policing that was replaced in 1829 and why this occurred the importance of foot patrol to the new force with its strengths and weaknesses the re emergence of detective policing and the legal powers and judicial support available to officers in the capital Very importantly this study also considers the problems thrown up by the new style of policing its potential for abuse and the public resistance that this sometimes encouraged

Police control systems in Britain, 1775-1975 Chris Williams, 2015-11-01 During the last two centuries the job of policing in Britain has been transformed several times This book analyses the ways that police institutions have controlled the individual constable on the front line The eighteenth century constable was an independent artisan his successor in the Metropolitan Police and other new forces was ferociously disciplined and closely monitored Police have been controlled by a variety of different practices ranging from direct day to day input from the community

through bureaucratic systems built around exacting codes of rules to the real time control of officers via radio and latterly the use of centralised computer systems to deliver key information Police forces became pioneers in the adoption of many technologies including telegraphs telephones office equipment radio and computers and this book explains why and how this happened considering the role of national security in the adoption of many of these innovations It will be of use to a range of disciplines including history criminology and science and technology studies *The Local Historian* ,1989 [The English Police](#) Clive Emsley,2014-09-19 A comprehensive history of policing from the eighteenth century onwards which draws on largely unused police archives Clive Emsley addresses all the major issues of debate he explores the impact of legislation and policy at both national and local levels and considers the claim that the English police were non political and free from political control In the final section he looks at the changing experience of police life Established as a standard introduction to the subject on its first appearance the Second Edition has been substantially revised and is now published under the Longman imprint for the first time **Bibliography of Printed Works on London History to 1939** Heather Creaton,Tony Trowles,1994 The history of London is so important in national and indeed international terms it seems extraordinary that this is the first general bibliography of the subject to appear It contains over 22 000 selected references to books and articles on the history of London from the Dark Ages to the beginning of the Second World War The whole of the former GLC area plus the City is covered Arrangement is by subject and there is a substantial analytical index Material for the bibliography was collected from specialist libraries all over London and beyond It is a starting point for any enquiry about London s development over the centuries whether from the academic historian the amateur or the general enquirer A supplement is planned to cover new material on the period *Whitaker's Books in Print* ,1990 **The British National Bibliography** Arthur James Wells,1968 **Proceedings** ,1980 *Crime, Justice, History* Eric H. Monkkonen,2002 Crime in the U S and the institutions for its control are deeply embedded in and shaped by history The historical origins have often become invisible and their recovery difficult but any understanding of the contemporary situation requires historical context For over twenty five years Eric H Monkkonen has worked on some of the puzzles and problems in recovering the history of crime and police Much of his work has appeared in articles often in specialized journals or not in English which this book collects for the first time In addition to Monkkonen s major published articles this volume includes several new ones The topics embrace violence public disorder policing popular culture and contrasts between the U S and Europe Some articles illuminate special methodological and source issues that challenge historians of criminal justice As well as dealing with serious crime this book includes several articles on specifically urban problems and solutions associated with disorder crime and poverty In contrast to the more technical articles several chapters which originally appeared as op ed pieces show how historical understanding can help address current policy issues in crime and crime control All too often current policy debates occur without proper historical background As a result old ideas that have been tried and rejected are re introduced or new and sometimes simple

ideas are ignored California's Deadliest Earthquakes: A History Abraham Hoffman, 2017 Home to hundreds of faults California leads the nation in frequency of earthquakes every year Despite enduring their share of the natural disasters residents still speculate over the inevitable big one More than three thousand people lost their lives during the 1906 San Francisco earthquake Long Beach's 1933 earthquake caused a loss of nearly 50 million in damages And the Northridge earthquake injured thousands and left a 550 million economic hit Historian Abraham Hoffman explores the personal accounts and aftermath of California's most destructive tremors **Whitaker's Book List**, 1989 *To Protect and to Serve* Robert C.
