From Perestroika To Privatisation:

From Perestroika to Privatisation Terry Cox, 1996 This study provides a sociological approach to the changes in economic relations that took place in Soviet society under Gorbachev including both the growth of small scale private ownership and centralized management of the economy Social and economic relations are also examined The Soviet Transition Ottorino Cappelli, Rita di Leo, Stephen White, 2014-04-08 Of course we watched it all on television day by day as the Evil Empire transmuted into the Circus Bear but seeing it and knowing what to think about it are not the same Scholars from eastern and western Europe and North America help out in 14 papers from an April 1992 conference in Naples

Privatizing Eastern Europe J.M. Van Brabant, 2012-12-06 This volume is meant to be a modest contribution to the ongoing debate about the transitions away from the administrative planning environment typical of the former communist regimes The central subject matter is a fairly special one namely the privatization of these economies together with the restoration and effective monitoring of property rights These are paramount tasks of the ongoing transformations once progress toward political democracy is secured Though I would not allot divestment of existing state owned assets the kind of pivotal importance that some observers reserve for it changing rules on the utilization of these assets is evidently at the core of what the transition toward market based economic systems should be all about Rather than examining the entire range of issues that surround the controversy on privatization this volume is primarily concerned with the economics of taking the state out of the decision making about existing assets Among the several aspects of this discussion three stand out One is the establishment of clear property rights This is fundamental to minimize transaction costs in an environment where decisions will increasingly be taken by independent economic agents acting on their own account Second I look only incidentally at the various angles of creating capital markets particularly for existing assets in these economies **Russia's Bitter Path to**

Modernity Alexander Chubarov, 2001-01-01 Will it follow the model of the Western capitalist democracies as those who applied the economic shock therapy of the early 90s hoped or will it chose its own distinct path of development In this history of Russia from 1917 to the present Alexander Chubarov teases out certain themes developed in his previous book on tsarist Russia The Fragile Empire One of the key factors to Russia's distinctiveness is its halfway location in the center of the Eurasian landmass This lends an inevitability to the traditional cultural schism between Westernizing reformers and Slavophiles Neither approach says Chubarov will work on its own Chubarov offers a balanced view abstaining from narrow ideologically biased assessments and examines the triumphs yes and failures of Russia's Soviet development within Russia's own cultural and historical context Without ever minimizing the brutalities of the Soviet period the state terror the collectivizations the labor camps the deportations of whole peoples Chubarov demonstrates much continuity between tsarist and Soviet Russia with the latter often repeating the former's mistakes Russia says Chubarov cannot turn its back on its Soviet experience Far from being a blind alley or aberrant phase the Soviet period was an organic part of Russia history and

was largely successful in turning Russia and most of the other Soviet republics into modern states **The Political Economy of Privatization** Thomas Clarke, Christos Pitelis, 2005-08-17 This book considers the many facets of the privatization process in advanced industrialised countries along with the marketization of Eastern Europe and the pressures on developing countries to adopt privatization as the route to growth **Privatisation and Its Limits in Central and Eastern Europe** H. Engerer, 2001-06-18 Hella Engerer analyses the emergence evolution and theory of property rights and establishes the limits for privatization of state owned enterprises in the transitional economies of Eastern Europe She counters the assumption that reduction of the state sector helps to create the basis for a private property system showing that privatization actually presupposes a stable framework including property order She makes use of an outstanding methodological approach reaching well beyond the limits of pure economic observation This is a major contribution to the understanding of the emerging economic order of Central and Eastern Europe **At the Crossroads of Post-Communist Modernisation** C. Pursiainen, 2012-09-10 This volume takes a comparative approach to understand general tendencies in post Communist transition in Russia and China Bringing together perspectives from Political Science Sociology and IR it analyses three arenas of social change socio economic systems political systems and foreign policies *Perestroika, Privatization, and Worker Ownership in the USSR* I. A. N. Keremet [s]ki, John Logue, 1991 Legal Aspects of Privatisation Bulent Seven, 2002 The main aims of this thesis are as follows a To present a comprehensive analysis of the concept of privatisation its origins and limits b To identify the legal and institutional framework for privatisation in different European countries from a comparative perspective c To define and analyse particularly legal issues which arise during the privatisation transactions e g labour law competition law etc d To evaluate which features of the successful legal and organisational framework of privatisation have been successful so as to provide guidelines for those individuals and organisations participating in the privatisation exercises This work found out that there is no simple internationally applicable recipe for privatisation various legal methods and techniques can be used to privatise state owned enterprises Because each country has different circumstances it is impossible to provide a unique model for privatisation each country needs to design its own model according to its circumstances Privatisation is an essential but insufficient element for structural economic reform in the economy and society Privatisation is not a panacea it is not the solution to every economic and administrative problem selling an enterprise to the private sector does not mean an end to all problems Also privatisation is not an overnight process or a magic touch it will be a lengthy process Furthermore a decision that something can be privatised does not mean that it should be privatised In that context privatisation is not good or bad it is an economic and social instrument If it is well designed it may bring substantial benefits to the economy and society In many countries many state owned enterprises particularly the ones which are financially weak have still not been privatised This finding revealed that the privatisation process will be in the political and economic agenda for at least few more decades **Moscow's**

Heavy Shadow Isaac McKean Scarborough, 2023-08-15 Moscow's Heavy Shadow tells the story of the collapse of the USSR from the perspective of the many millions of Soviet citizens who experienced it as a period of abjection and violence Mikhail Gorbachev and the leaders of the USSR saw the years of reform preceding the collapse as opportunities for rebuilding perestroika rejuvenation and openness glasnost For those in provincial cities across the Soviet Union however these reforms led to rapid change economic collapse and violence Focusing on Dushanbe Tajikistan Isaac McKean Scarborough describes how this city experienced skyrocketing unemployment a depleted budget and streets filled with angry young men unable to support their families Tajikistan was left without financial or military resources unable and unprepared to stand against the wave of populist politicians of all stripes who took advantage of the economic collapse and social discontent to try to gain power By May 1992 political conflict became violent and bloody and engulfed the whole of Tajikistan in war Moscow's Heavy Shadow tells the story of how this war came to be and how it was grounded in the reform and collapse of the Soviet economy that came before
