Rosenblatt, 2017-12-01 Darwin did not discover evolution He didn t trip over it on the way to somewhere else the way Columbus discovered the New World Like the atom planetary orbits and so many other scientific constructs evolution was invented in order to explain striking phenomena And it has been most successful A century and a half has not simply confirmed Darwin s work it has linked evolution to the mechanisms of life on the molecular scale It is what life does Where Darwin had drawn his theories from forest and field we now set them in the coiling and uncoiling of twists of DNA linking where they might with a host of molecular bits and pieces scurrying about Darwin himself however has been a closed story A century and a half of study of the man and his work including close readings of his books his notebooks and letters and even the books he read has led to a working appreciation of his genius The success of this account has however kept us from seeing several important issues most notably why did he

pursue evolution in the first place Buckets from an English Sea offers a new view of what inspired Darwin and provoked his work Stunning events early in the voyage of the Beagle challenged his deeply held conviction that people are innately good This study of 1832 highlights the resources available to the young Darwin as he worked to secure humanity s innate goodness
