business economics geography and political science wanting to get to grips with current thinking and developments *The Other Kuala Lumpur* Yeoh Seng Guan, 2014-02-05 Kuala Lumpur like many Southeast Asian cities has changed very significantly in the last two or three decades expanding its size and modernising and globalising its built environment For many people these changes represent progress and development This book however focuses on the more marginalised residents of Kuala Lumpur Among others it considers street hawkers and vendors refugees the urban poor religious minorities and a sexuality rights group and explores how their everyday lives have been adversely affected by these recent changes The book shows how urban renewal the law and ethno religious nationalism can work against these groups in wanting to live and work in the capital city of Malaysia **Sport: Race, Ethnicity and Identity** Daryl Adair, 2013-09-13

Sport has long been a paradoxical environment with respect to issues of race ethnicity and identity For much of the twentieth century sports around the world were enclaves of difference Whites and non whites for example were separated on the sports field as they were in many ways off the field Today sport is much more inclusive with athletic ability of greater importance than skin colour or ancestry Yet enmity and antagonism still appear in sport via instances of racial vilification or hostility between some groups Other problems include the relative absence of minorities from positions of power and influence in sport as well as folkloric assumptions about athletic ability based upon stereotypes about race or ethnic background This book discusses issues of diversity capacity and equity in the colourful world of global sport A panoramic approach covering race ethnicity and identity is consistent with the contemporary global migration of professional athletes as well as the multicultural contexts of sport in various regions This collection of essays therefore addresses international dimensions of sport commonality and difference as well as the special circumstances of sport and social relations in particular places This book was previously published as a special issue of *Sport in Society* **Careers in Science and Technology** Advisory

Committee, Office of International Organizations and Programs and Office of Scientific and Engineering Personnel, Office of International Affairs, Policy and Global Affairs, National Research Council, 1996-03-01 Every industrialized country is concerned with maintaining an adequate supply of individuals interested in careers in science and technology yet little is known about these efforts outside national borders This book represents the proceedings of an international conference on Trends in Science and Technology Careers held in Brussels in 1993 Organized at the behest of OSEP and the OIA Committee on International Organizations and Programs in cooperation with the European Commission DG XII and in response to a resolution of the International Council of Scientific Unions the conference identified international data on career trends assessed the research base engaged in studying science and technology careers and identified ways in which international organizations could promote greater interest in science and technology human resource development The conference laid the groundwork for continuing international discussions about the best ways to study and promote careers in science and technology and national dialogues about the ways to integrate this knowledge into human resources policies *America's*

Other Automakers Timothy J. Minchin, 2021-04 In 2018 almost half of all vehicles made in North America were produced at foreign owned plants and the sector was on track to monopolize the market Despite this the industry has been overlooked compared with its domestic counterpart both in scholarship and popular memory Redressing this neglect America's Other Automakers provides a new history of the foreign-owned auto sector the first to extensively draw on archival sources and to articulate the human agency of participants including workers managers and industry recruiters Timothy J Minchin challenges the view that the industry's growth primarily reflected incentives stressing human agency and the complexity of individual stories instead Deeply human in its approach the book also explores the industry's impact on grassroots communities showing that it had more costs than supporters acknowledged Drawing on a wide range of primary and secondary sources America's Other Automakers uncovers significant tensions over unionization reports of discriminatory hiring and unease about the industry's rapid growth critically exploring seven large assembly facilities and their impact on the communities in which they were built The Malcolm Baldrige National Quality Awards Program United States.

Congress. House. Committee on Science. Subcommittee on Technology, 1995 *The Neighborhood of Gods* William Elison, 2018-12-10 There are many holy cities in India but Mumbai is not usually considered one of them More popular images of the city capture the world's collective imagination as a Bollywood fantasia or a slumland dystopia Yet for many if not most people who live in the city the neighborhood streets are indeed shared with local gods and guardian spirits In *The Neighborhood of Gods* William Elison examines the link between territory and divinity in India's most self consciously modern city In this densely settled environment space is scarce and anxiety about housing is pervasive Consecrating space first with impromptu displays and then eventually with full blown temples and official recognition is one way of staking a claim But how can a marginalized community make its gods visible and therefore powerful in the eyes of others *The Neighborhood of Gods* explores this question bringing an ethnographic lens to a range of visual and spatial practices from the shrine construction that encroaches on downtown streets to the tribal art practices of an indigenous group facing displacement to the work of image production at two Bollywood film studios A pioneering ethnography this book offers a creative intervention in debates on postcolonial citizenship urban geography and visuality in the religions of India

Wiarda, 2016-05-13 Political culture refers to the basic values ideas beliefs and political orientations by which countries societies and whole regions are guided The underlying belief systems that shape cultures and societies and cause them to behave in certain often distinct ways The puzzle or query that chiefly concerns this author is why the United States US and its foreign policy have such a hard time understanding cultures and societies other than their own This provocative book argues that the US needs to end its attitudes of superiority and condescension toward other nations and cultures and redirect its foreign policy accordingly After an introduction that sets forth the main theoretical and conceptual arguments the next chapters explore all the main areas of the world The Conclusion pulls all these themes together analyzes the common
