Getting Into Print Walter W. Powell, 1985 Based on extensive fieldwork at two well known commercial publishers of scholarly books Walter W Powell details the different ways in which both internal politics and external networks influence decisions about what should be published Powell focuses on the work of acquisitions editors how they decide which few manuscripts out of hundreds to sponsor for publication how editorial autonomy is shaped but never fully curbed by unobtrusive controls and how the search process fits into the social structure of the American academy Powell's observations and the many candid remarks of publishers and their staffs recreate the workaday world of publishing Throughout the sociology of organizations and of culture serves as Powell's interpretive framework Powell shows how scholarly publishers help define what is good social science research and how the history and tradition of a publishing house contribute to the development of an organizational identity Powell's review of actual correspondence from outside letters proposing projects to internal kill letters of rejection suggests that editors and authors at times form their own quasi organization with external allegiances and bonds beyond those of the publishing house This is a welcome addition to the literature on the life of the organizations that produce our science and our culture Powell's intimate look at two scholarly publishing companies has an insider's appreciation of the book business and an outsider's eye for questions the editors are not asking themselves Michael Schudson University of California at San Diego *Getting Into Print* will long be the book about how academic editors choose the titles they sponsor Even experienced editors and authors will find new insights here and revealing comparisons with decision making in other kinds of organizations Edward Tenner Los Angeles Times Book Review *Getting Into Print* is an unusually outstanding ethnographic study in that it reflects the evocative richness of detail associated with the ethnographic approach while simultaneously maintaining a clear headed analytical distance from the subject that allows for a meaningful theoretical contribution Powell is an astute ethnographer who presents a vital and compelling insider's view of the decision making process in scholarly publishing making this book fascinating reading for all those involved in the publish or perish syndrome Barbara Levitt American Journal of Sociology
