## Getting Great Graphics:

**Getting (more out of) Graphics** Antony Unwin, 2024-09-13 Data graphics are used extensively to present information. Understanding graphics is a lot about understanding the data represented by the graphics, having a feel not just for the numbers themselves, the reliability and uncertainty associated with them, but also for what they mean. This book presents a practical approach to data visualisation with real applications front and centre. The first part of the book is a series of case studies, each describing a graphical analysis of a real dataset. The second part pulls together ideas from the case studies and provides an overview of the main factors affecting understanding graphics. Key Features: Explains how to get insights from graphics; Emphasises the value of drawing many graphics; Underlines the importance for analysis of background knowledge and context. Readers may be data scientists, statisticians, or people who want to become more visually literate. A knowledge of Statistics is not required, just an interest in data graphics and some experience of working with data. It will help if the reader knows something of basic graphic forms such as bar charts, histograms, and scatterplots. How to Think Like a Great Graphic Designer Debbie Millman, 2010-06-29 Take a peek inside the heads of some of the world's greatest living graphic designers. How do they think? how do they connect to others? what special skills do they have? In honest and revealing interviews, nineteen designers, including Stefan Sagmeister, Michael Beirut, David Carson, and Milton Glaser, share their approaches, processes, opinions, and thoughts about their work with noted brand designer Debbie Millman. The internet radio talk host of Design Matters, Millman persuades the greatest graphic designers of our time to speak frankly and openly about their work. How to Think Like a Great Graphic Designer offers a rare opportunity to observe and understand the giants of the industry. Designers interviewed include Milton Glaser, Stefan Sagmeister, David Carson, Paula Scher, Abbott Miller, Lucille Tenazas, Paul Sahre, Emily Oberman, and Bonnie Siegler. Chip Kidd, James Victore, Carin Goldberg, Michael Bierut, Seymour Chwast, Jessica Helfand, and William Drenttel. Steff Geissbuhler, John Maeda.
