It Can't Get Any Better Than This Esta Freeland Cox, 2004-10 You hear the term melting pot applied to the American Experience over and over again but it seldom hits home until you put a face on those that are melting Esta Freeland Cox is one of those faces Her grandmother was an emigrant from Wales and her father from English ancestry Racy stories of early family members serving at the King's court in London can be found on one side of the family as well as knights fighting Moors Interspersed among the famous are lists of those common folk farmers small business owners men and woman miners and entrepreneurs Among them all is found this wonderful woman 91 years old at the time of the publication of this book She was one of a family of 12 kids going through the depression years numerous wars marriage and the deaths of siblings and two husbands and two sons Yet this 91 year old still shovels her own snow and walks two miles a

day I am sure you will find these writings an inspiration for your life as you see the mind of this saint in print *The Two Faces of the Church...Get Right with God* Zamora Gonzalez,2019-02-15 Frustrated and angry with members in the church and discouraged by their behavior Ever felt betrayed and treated like a stranger by the church family Struggling to stay in the church and fearful about the future without God in it In *The Two Faces of the Church Get Right With God* Zamora shares with transparency about the church shortcomings and how to stay connected to God and worthy of Him Zamora shares her struggles to remain faithful to God as she noticed a shift in the church from holiness to carnality and the drifting away from Bible doctrines and the life changing moment that brought her inner peace Through her own experience vignettes and Biblical tips she guides the way to healing and repentance that will draw you nearer to God as you discover You can stand up and do what you were called to do for the church You will not allow the problems of this world and the ungodly behaviors of the church members to affect you anymore You will encounter many trials and tribulations but will remember that God remains faithful and true to His word He will not walk away and leave you You were not saved by your own volition but by God's pursuit to save you and you are still here because God has extended your life for His purpose If you who have been emotionally injured and experienced grave disappointments in the church and have questioned your walk with God this book is for you *Child Life* ,1915 Teaching. 30 Years of My Life Brenda Tate Groat,2010-08-03 Teaching Thirty Years of My Life I think I wanted to be a teacher because I thought it was important I wanted to do something important I stayed teaching because much of the time it was fun and I was I never bored Think about the times you have watched a little kid do something miraculous amazing or hilarious Kids are fun to watch They surprise you and keep you young You cannot help but remember the good and hard times of growing up without actually having to do it over The flip side to this is the number of times you may have been annoyed with your own child teenager adult daughter or son and of course the times you were so angry you couldn't function Well multiply that feeling by seventy five kids each year for thirty years I'd like to say a thing or two about state and federal mandated tests Actually I'd like to say a lot Thus far no one has asked for my opinion but here it is The feds and the states want the public schools to be accountable Our society wants assurances the tax dollars they spend will produce educated kids I get it Side note The conspiracy part of my brain cannot help but wonder if the anti public school fringe has found a way to target the public school system and reduce tax dollars going to this endeavor Is it possible the people doling out the funds and the mandates for public schools are hoping for failure Or maybe they just have no clue as to what is needed to educate all of America's children not just a very few privileged children All our children must receive a great education if America wants to remain a worldwide powerhouse It's amazing to me all the talk about evaluating teachers on student test scores especially if that measurement is based on an arbitrary cut score 80 percent pass 79 percent fail Students are not piecemeal Students cannot and should not be measured like bolts on an assembly line in tolerance out of tolerance People are multi dimensional A test will never tell us all that a child knows or doesn't know In the kindest words

this idea of measuring students and evaluating teachers on a single high stakes test is very misguided More to the point this is a really stupid idea and a very dangerous practice Whatever happened to the notion All kids can learn but not always at the same time or same rate When did we ever want people in America to be the same We all benefit from our differences When I look over and reflect on the variety and diversity new buzz word of the decade of my fellow teachers not one of us is like the other Our teaching styles are vastly different We relate to students differently We relate with each other differently We all work together to teach and maximize our students time with us I might be less annoyed if student improvement was used as a measure of teacher effectiveness Even this approach has major flaws A teacher has a student for nine months In my case students are thirteen or fourteen years old They have had thirteen or fourteen years of prior experiences and baggage before getting to me Five of those years school was not even a part of their lives Research tells us when kids come to school in kindergarten the variances are huge The thought is as a school we should be able to narrow the variances What actually happens is these variances increase Is the school or the teachers responsible for this No What is going on Teachers usually have students for about six to seven hours a day and 180 days a year In the state of Kansas this equates to at least 1116 hours each year Even if we as a nation ever went to year round school the number of days probably wouldn't increase significantly the days would just be spread out This might help might not Most of the research I've read is not conclusive one way or the other Time allocated for school learning amounts to just under twenty percent of the hours in a year 365 days Teachers can't
