

Your computer connects to the router using TCP/IP and asks for a local IP address

The router responds and gives your computer the local IP address 192.168.1.12

Your router requests an IP address to connect to the Internet. The ISP assigns your WAN address as 175.51.127.17

While on the Internet you request access to the Computer Hope server by entering the URL <http://www.computerhope.com>. Using DNS that address is translated to an IP address 69.72.169.241 and the TCP/IP packet travels over multiple routers and computers until it reaches that address.

Your TCP/IP packet reaches its destination and communicates with the other computer it responds and repeats the above steps to get the data back to your computer.
