Grain World, 1909 **African Handbook of Climate Change Adaptation** Nicholas Oguge, Desalegn Ayal, Lydia Adeleke, Izael da Silva, 2021-05-20 This open access book discusses current thinking and presents the main issues and challenges associated with climate change in Africa It introduces evidences from studies and projects which show how climate change adaptation is being and may continue to be successfully implemented in African countries Thanks to its scope and wide range of themes surrounding climate change the ambition is that this book will be a lead publication on the topic which may be regularly updated and hence capture further works Climate change is a major global challenge However some geographical regions are more severely affected than others One of these regions is the African continent Due to a combination of unfavourable socio economic and meteorological conditions African countries are particularly vulnerable to climate change and its impacts The recently released IPCC special report Global Warming of 1.5°C outlines the fact that keeping global warming by the level of 1.5°C is possible but also suggested that an increase by 2.0°C could lead to crises with crops agriculture fed by rain could drop by 50% in some African countries by 2020 and livestock production could damage water supplies and pose an additional threat to coastal areas The 5th Assessment Report produced by IPCC predicts that wheat may disappear from Africa by 2080 and that maize a staple will fall significantly in southern Africa Also arid and semi arid lands are likely to increase by up to 8% with severe ramifications for livelihoods poverty eradication and meeting the SDGs Pursuing appropriate adaptation strategies is thus vital in order to address the current

and future challenges posed by a changing climate It is against this background that the African Handbook of Climate Change Adaptation is being published It contains papers prepared by scholars representatives from social movements practitioners and members of governmental agencies undertaking research and or executing climate change projects in Africa and working with communities across the African continent Encompassing over 100 contributions from across Africa it is the most comprehensive publication on climate change adaptation in Africa ever produced *Weekly Weather and Crop Bulletin* ,1999 **Weekly Weather and Crop Bulletin** Lucius W.
