Experiences of health and illness are fundamental to how we understand ourselves and the postmodern obsession with body image has made health even more significant in identity formation The study of subjective experiences of health and illness can also provide a challenge to traditional objective medical knowledge and given current healthcare interest in user involvement can highlight the need for change in health service provision This book explores the interplay between identity and health private and public mind and body Drawing on new material and using and exploring innovative biographical and narrative methods it covers a broad range of identities in relation to health and illness including race religion ethnicity disability age body image sexuality and gender Identity and Health will be of great interest to academics researchers and students of sociology medical anthropology health and psychology *Modernity and Self-Identity* Anthony Giddens,2013-04-30 This major study develops a new account of modernity and its relation to the self Building upon the ideas set out in *The Consequences of Modernity* Giddens argues that high or late modernity is a post traditional order characterised by a developed institutional reflexivity In the current period the globalising tendencies of modern institutions are accompanied by a transformation of day to day social life having profound implications for personal activities The self becomes a reflexive project sustained through a revisable narrative of self identity The reflexive project of the self the author seeks to show is a form of control or mastery which parallels the overall orientation of modern institutions towards colonising the future Yet it also helps promote tendencies which place that orientation radically in question and which provide the substance of a new political agenda for late modernity In this book Giddens concerns himself with themes he has often been accused of unduly neglecting including especially the psychology of self and self identity The volumes are a decisive step in the development of his thinking and will be essential reading for students and professionals in the areas of social and political theory sociology human geography and social psychology **Style, Identity and Literacy** Christopher Stroud,Lionel Wee,2011-11-28 *Style Identity and Literacy* English in Singapore is a qualitative study of the literacy practices of a group of Singaporean adolescents relating their patterns of interaction both inside and outside the classroom to the different levels of social organization in Singaporean society home peer group and school Combining field data gathered through a series of detailed interviews with available classroom observations the study focuses on six adolescents from different ethnic and social backgrounds as they negotiate the learning of English against the backdrop of multilingual Singapore This book provides social explanations for the difficulties and challenges these adolescents face by drawing on current developments in sociolinguistics literacy studies English language teaching and language policy *Ethos and Identity* Alan

Merriam,2017-07-28 Ethos and Identity asks the ever puzzling question What is ethnicity and how is it to be explained In a new introduction to this work Athena Leoussi describes Epstein s response to this challenging age old query and demonstrates why this classic volume is of continuing importance Originally published thirty years ago Ethos and Identity still fascinates the twenty first century reader Epstein s volume explains ethnic revivals of the past century while the new introduction discusses those that occurred after the book s original publication such as during the collapse of the communist Eastern bloc in the 1990s Epstein offers insight into other ethnic reawakenings such as that experienced during the late 1960s and early 1970s after the collapse of post colonial east Asia Prior to this in the late 1940s and early 1950s following World War II and the establishment of the United Nations it was expected that ethnic identifications would be superseded by a more modern universalistic rational civic or class based form This did not occur Instead as nations collapsed and were reborn in new forms people continued to identify with their ethnicity in describing themselves even when their countries at least as they knew them no longer existed In short people and their cultures live on long after political and national boundaries have disappeared and been redrawn Epstein s decisive contribution to the understanding of ethnicity proposes a social anthropology of affect People incorporate the social structure of ethnicity into the makeup of their personality and thus self identification Ethos and Identity is sure to interest students of anthropology sociology psychoanalysis psychology and ethnicity

Identity Formation, Youth, and Development Kyle Eichas, James E. Côté, Charles G. Levine, 2025-09-15 A landmark volume in the scientific study of identity formation and youth development this fully revised second edition synthesizes sociological and psychological approaches to the study of identity It illuminates the challenges and opportunities that contemporary young people face as they attempt to form identities in societies undergoing transition The book introduces simplified identity formation theory which helps newcomers connect the dots across a broad and promising area of study Part I places the identity question in historical and cultural context providing a multidimensional framework for studying the developmental dynamics of identity formation Part II examines the development of perspective taking and moral reasoning exploring their relationship to ethics and agency in identity formation Part III investigates scientific evidence concerning identity formation in various societal contexts implications for understanding youth mental health problems and the most promising treatments programs and practices for addressing the identity issues young people face today This book is an essential text for advanced undergraduate and graduate students studying self and identity development within developmental psychology social psychology clinical psychology and sociology Educators and practitioners in child welfare mental health services social work youth and community work and counseling will also benefit from its introductory and jargon free nature

Well-Being of Youth and Emerging Adults across Cultures Radosveta Dimitrova, 2018-01-02 The current volume presents new empirical data on well being of youth and emerging adults from a global international perspective Its outstanding features are the focus on vast geographical regions e g Europe Asia Africa North and South America and on strengths and resources for optimal well being The international and multidisciplinary contributions address the complexities of young people s life in a variety of cultural settings to explore how key developmental processes such as identity religiosity and optimism social networks and social interaction in families and society at large promote optimal and successful adaptation The volume draws on core theoretical models of human development to highlight the applicability of these frameworks to culturally diverse youth and emerging adults as well as universalities and cultural specifics in optimal outcomes With its innovative and cutting edge approaches to cultural theoretical and methodological issues the book offers up to date evidence and insights for researchers practitioners and policy makers in the fields of cross cultural psychology developmental science human development sociology and social work

Youth Development in Identity Societies James E. Cote, 2018-10-31 This book

explores the causes and consequences of the contradictions in young people's lives stemming from the affluence purpose paradox a lack of purpose in life among many of those living in the most affluent societies in human history This paradox is endemic to identity societies where people experience a choice contingent life course and is examined using an interdisciplinary approach largely with an integration of developmental psychology and sociology but also using historical anthropological economic and political perspectives The transition to adulthood is now commonly a prolonged process with young people facing a number of psychological challenges and sociological obstacles in their identity formation Challenges include difficulties in making prudent choices about goals Obstacles involve cross pressures in the wider society as well as in educational institutions Consequently many youth experience their education as alienating and stressful rather than as an opportunity for personal development Those without a sense of purpose have more difficulties with their identity formation that can produce symptoms of anxiety and depression The current student mental health crisis is examined in this context An additional challenge is an ambiguously defined adulthood Young people who are confused about appropriate adult roles often value hedonistic activities rooted in narcissism and materialism rather than in more fulfilling long term goals Conversely those who are agentic in their personal development can thrive in adulthood especially when they combine agency with generativity This book ends with a series of recommendations for researchers and policy makers to help youth cope with the affluence purpose paradox *Identity and Anxiety ... The concept of identity is one of the most important ideas the social sciences have investigated in recent years yet no introductory textbooks are available to those who want to gain a sense of this burgeoning field The first of its kind this text provides an introduction to the scientific study of identity formation with a focus on youth development The analyses of the problems and prospects faced by contemporary young people in forming identities are placed in the context of societies that

themselves are in transition further complicating identity formation and the interrelated processes of self development and moral ethical reasoning In order to sort through what is now a vast literature on the various aspects of human identity this book introduces the Simplified Identity Formation Theory This theory cuts through much of the academic jargon that limits the accessibility of this promising field and builds an understanding of human identity from first principles This book is optimized for students and instructors featuring several useful pedagogical tools and a robust series of online resources Primer format the text synthesizes the vast and disparate literature that has characterized the field of Identity Studies with a focus on identity formation during the transition to adulthood theory and research is discussed in plain non technical language using the author s new Simplified Identity Formation Theory In text pedagogy to enhance student engagement box insert and in text examples from current events popular culture and social media are incorporated throughout the text key terms are in bold in each chapter and combined in a glossary at the end of the text Online resources for instructors A robust set of resources that when combined with the text provides a complete blueprint for designing an identity course resources include PowerPoint Presentations test bank sample syllabi and instructor manuals for both face to face and online courses that include weekly written assignment questions and discussion forum questions along with essay topic ideas and grading rubrics Online resources for students a student manual flashcards practice quizzes and exercises with video links

Psychoanalytic Perspective Michael Washburn,1994-07-01 In this book Michael Washburn provides a psychoanalytic foundation for transpersonal psychology Using psychoanalytic theory Washburn explains how ego development both prepares for and creates obstacles to ego transcendence Spiritual development he proposes can be properly understood only in terms of the ego development that precedes it For example many difficulties encountered in spiritual development can be traced to

repressive underpinnings of ego development and significant gender differences in spiritual development can be traced to corresponding gender differences that emerge during ego development Washburn draws on a wide range of psychoanalytic perspectives in discussing ego development and uses both Eastern and Western sources in discussing spiritual development In rethinking transpersonal psychology in psychoanalytic terms he explains how essential elements of Jungian thought can be grounded in psychoanalytic theory

The Discourse of Europe Sharon Millar, John Wilson, 2007-10-25 In this volume we approach the question of what it is to be European by considering the way in which citizens talk about their everyday lives as they are perceived against the background of Europe and European issues Hence the volume will offer insights into the rarely glimpsed micro political world of ordinary talk and explore the way in which such talk in social interaction and other spheres might help us understand what Europe means to a range of its citizens Using a range of broadly discursive approaches we will touch on inter alia issues of identity youth borders ethnicity local politics and minority languages In the end we suggest it is a common sense view of pragmatic utility that centres what it is to be European and this is something which is continually fluid and shifting within ever changing social historical and political circumstances
