Islam in Russia: The Politics of Identity and Security Shireen Hunter, 2016-09-16 This richly detailed study traces the shared history of Russia and Islam in expanding compass from the Tatar civilization within the Russian heartland to the conquered territories of the Caucasus and Central Asia to the larger geopolitical and security context of contemporary Russia on the civilizational divide The study's distinctive analytical drive stresses political and geopolitical relationships over time and into the very complicated present Rich with insight the book is also an incomparable source of factual information about Russia's Muslim populations religious institutions political organizations and ideological movements

Security, Identity and Interests Bill McSweeney, 1999-11-04 Bill McSweeney addresses the central problem of international relations security and constructs a novel framework for its analysis He argues for the unity of the interpersonal societal and international levels of human behaviour and outlines a concept of security which more adequately reflects the complexity and ambiguity of the topic This book introduces an alternative way of theorizing the international order within which the idea of security takes on a broader range of meaning inviting a more critical and interpretative approach to understanding the concept and formulating security policy The recent shift to sociology in international relations theory has not as yet realized its critical potential for the study of security Drawing on contemporary trends in social theory Dr McSweeney argues that human agency and moral choice are inherent features of the construction of the social and thus international order and hence of our conception of security and security policy

Europeanization of National Security Identity Pernille Rieker, 2006-05-09 This new book tackles two key questions 1 How is the EU functioning as a security actor 2 How and to what extent is the EU affecting national security identities Focusing on the four largest Nordic states Denmark Finland Norway and Sweden this incisive study analyzes how and to what extent the EU affects national security identities It shows how the EU has developed into a special kind of security actor that due to its level of political integration has an important influence on national security approaches and identities This new analysis applies a fresh combination of integration theory security studies and studies of Europeanization The main argument in this book is that rather than adapting to the changing conditions created by the end of the Cold War the Nordic states changed their security approaches in response to the European integration process It shows how different phases in the post

Cold War European integration process have influenced the national security approaches of Sweden Finland Denmark and Norway While all four security approaches seem to have been Europeanized the speed and the character of these changes seem to vary due to a combination of differing ties to the EU and differing security policy traditions This new book will be of great interest to all students of European Defence national security and of security studies in general Canadian-American Slavic Studies ,2004 A quarterly journal devoted to Russia and East Europe **Rethinking Security in the Age of Migration** Ali Bilgic,2013-09-02 Migration and especially irregular migration are politically sensitive and highly debated issues in the developed world particularly in Europe This book analyses irregular protection seeking migration in Europe with close attention to sub Saharan migration into the EU from the perspective of emancipatory security theory Some individuals leave their countries because political social and economic structures largely fail to provide protection This book examines how communities respond to migrants who seek protection and security where migration is perceived as a source of insecurity by many in that community The central aim of this critical analysis is to explore ideas and practices which can contribute to replacing the political structures of insecurity with emancipatory structures where individuals both irregular migrants and members of the receiving communities enjoy security together not opposed to each other Drawing on the security dilemma critical approaches to security forced migration and trust the book demonstrates how common life between two groups of individuals can be politically constructed in tandem with limitations risks and possible handicaps of initiating such a construction in world politics Rethinking Security in the Age of Migration will be of interest to students and scholars of migration studies security studies international relations European politics and sociology The Routledge Handbook of Religion and Security Chris Seiple,Dennis Hoover,Pauletta Otis,2013 This Handbook offers analyses of how nine different world religions have related to issues of war and peace theologically and practically overviews of how scholars and practitioners in nine different topical areas of security studies have or have not dealt with the relationship between religion and security and five case studies of particular countries in which the religion security nexus is vividly illustrated Nigeria India Israel the former Yugoslavia and Iraq GLOBAL SECURITY AND INTERNATIONAL POLITICAL ECONOMY - Volume I P.Bilgin, P.D.
