## Identity Consciousness And Value:

Identity, Consciousness and Value Peter Unger, 1990-07-12 The topic of personal identity has prompted some of the liveliest and most interesting debates in recent philosophy In a fascinating new contribution to the discussion Peter Unger presents a psychologically aimed but physically based account of our identity over time While supporting the account he explains why many influential contemporary philosophers have underrated the importance of physical continuity to our survival casting a new light on the work of Lewis Nagel Nozick Parfit Perry Shoemaker and others Deriving from his discussion of our identity itself Unger produces a novel but commonsensical theory of the relations between identity and some of our deepest concerns In a conservative but flexible spirit he explores the implications of his theory for questions of value and of the good life

*The Privacy of the Psychical* Amihud Gilead, 2011-01-01 This book argues that the irreducible singularity of each person as a psychical subject implies the privacy of the psychical and that of experience and yet the private accessibility of each person to his or her mind is compatible with interpersonal communication and understanding The book treats these major issues against the background of the author's original metaphysics panenmentalism

*Rereading Identity Deception in the UK Sexual Offences Act 2003* Rakiya Farah, 2023-11-10 Does the Sexual Offences Act SOA 2003 provide for consent to be vitiated in all the circumstances we think it should Can and should section 76 2 b the impersonation provision be read to include a different class of identity deceptions How should the concept of personal identity be understood in this context While the concept has had some airing in the courts and the distinction between identity and attributes of the person softened the law on rape still fails to give proper effect to identity deception and leaves many questions unanswered This book offers a novel take on the problem of sexual deception Through meticulous interrogation of the meaning and normative implications of the concept of personal identity it challenges the law's restrictive approach and argues that qualitative identity is like numerical identity normatively important This book provides a comprehensive and nuanced analysis of the philosophical theoretical and psychological experimental literature on personal identity marshalling relevant insights to support a broader reading of the impersonation provision The argumentative thrust of the book is an extended equivalence thesis which links numerical with

qualitative identity In this task it engages in capacious exploration of different kinds of impersonation at each juncture leading the reader to a more permissive understanding Guided by the principle of consistency the central thesis is that certain deceptions about personal traits should be unlawful based on existing prohibitions with which there is equivalence A central contribution of the book is the articulation of a theoretical framework to support a richer understanding of identity giving due attention to its qualitative aspects This new framework is applied at stage three of the equivalence thesis to explain the relationship between individual traits and identity change By implication a potentially wide scope of consent vitiating deceptions is endorsed This presents a challenge to those who would defend more stringent limits The book thus invites further discussion on the implications of this approach for the law on rape and indicates areas for further research and attention

**Identity-Conscious Supervision in Student Affairs** Robert Brown, Shruti Desai, Craig Elliott, 2019-11-21 This guide offers current and future student affairs practitioners a new conceptual framework for identity conscious and intersectional supervision Presenting an original and transformative model to address day to day challenges this book gives practitioners a strategic approach to engage in self work identity exploration relationship building consciousness raising trust development and organizational change ultimately helping them become more adept at supervising people from a range of backgrounds and experiences Chapters include theoretical underpinnings practical tips case studies and discussion questions to explore strategies in real life contexts Identity Conscious Supervision in Student Affairs is a key tool for student affairs practitioners to effectively change systems of dominance and inequity on their campuses

**Rule of Law, Common Values, and Illiberal Constitutionalism** Tímea Drinóczi, Agnieszka Bień-Kacała, 2020-09-08 This book challenges the idea that the Rule of Law is still a universal European value given its relatively rapid deterioration in Hungary and Poland and the apparent inability of the European institutions to adequately address the illiberalization of these Member States The book begins from the general presumption that the Rule of Law since its emergence has been a universal European value a political ideal and legal conception It also acknowledges that the EU has been struggling in the area of value enforcement even if the necessary mechanisms are available and given an innovative outlook and more political commitment could be successfully used The authors appreciate the different approaches toward the Rule of Law both as a concept and as a measurable indicator and while addressing the core question of the volume widely rely on them Ultimately the book provides a snapshot of how the Rule of Law ideal has been dismantled and offers a theory of

the Rule of Law in illiberal constitutionalism It discusses why voters keep illiberal populist leaders in power when they are undeniably acting contrary to the Rule of Law ideal The book will be of interest to academics and researchers engaged with the foundational questions of constitutionalism The structure and nature of the subject matter covered ensure that the book will be a useful addition for comparative and national constitutional law classes It will also appeal to legal practitioners wondering about the boundaries of the Rule of Law     *The Human Animal* Eric T. Olson, 1999-09-02 Most philosophers writing about personal identity in recent years claim that what it takes for us to persist through time is a matter of psychology In this groundbreaking new book Eric Olson argues that such approaches face daunting problems and he defends in their place a radically non psychological account of personal identity He defines human beings as biological organisms and claims that no psychological relation is either sufficient or necessary for an organism to persist Rejecting several famous thought experiments dealing with personal identity he instead argues that one could survive the destruction of all of one's psychological contents and capabilities as long as the human organism remains alive     *Philosophical Papers* Peter K. Unger, 2006-03-02 Collected in two volumes this work includes articles spanning over 40 years of philosopher Peter Unger's long career Dividing the articles thematically this first volume collects work in epistemology and ethics among other topics while the second volume focuses on metaphysics     *The Bounds of Agency* Carol Rovane, 2019-03-26 The subject of personal identity is one of the most central and most contested and exciting in philosophy Ever since Locke psychological and bodily criteria have vied with one another in conflicting accounts of personal identity Carol Rovane argues that as things stand the debate is unresolvable since both sides hold coherent positions that our common sense she maintains is conflicted so any resolution to the debate is bound to be revisionary She boldly offers such a revisionary theory of personal identity by first inquiring into the nature of persons Rovane begins with a premise about the distinctive ethical nature of persons to which all substantive ethical doctrines ranging from Kantian to egoist can subscribe From this starting point she derives two startling metaphysical possibilities there could be group persons composed of many human beings and multiple persons within a single human being Her conclusions support Locke's distinction between persons and human beings but on altogether new grounds These grounds lie in her radically normative analysis of the condition of personal identity as the condition in which a certain normative commitment arises namely the commitment to achieve overall rational unity within a rational point of view It is by virtue of this normative commitment that individual agents can engage one another specifically as persons and possess the distinctive ethical status of persons Carol Rovane is Associate Professor of Philosophy at Yale University Originally published in 1997 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published

by Princeton University Press since its founding in 1905      *Models of the Self* Shaun Gallagher, Jonathan Shear, 1999 A comprehensive reader on the problem of the self as seen from the perspectives of philosophy development psychology robotics cognitive neuroscience psychopathology semiotics phenomenology and contemplative studies all focused on a keynote paper      Identity-Conscious Educator Liza A. Talusan, 2022-02-25 Learn powerful practical strategies for creating an inclusive school community The Identity Conscious Educator provides a framework for building awareness and understanding of five identity categories race social class gender sexual orientation and disability Connect with vignettes and personal stories from the author that illuminate how to address identity topics in your personal and professional life Then develop skills in engaging in meaningful interactions with students and peers Discover how identity affects both personal and professional lives Review a framework for building habits and skills of identity conscious teaching and learning Build knowledge of five different identity categories and experiences race social class sexual orientation gender and disability and then act for positive change Reflect with end of chapter questions Review practical research based strategies and activities for having difficult conversations and creating more inclusive communities Contents Preface Introduction Part I Getting Ready for Identity Work Chapter 1 The Journey to Identity Awareness Chapter 2 The Shift From Avoiding Conflict to Inviting Challenge Part II Building Your Identity Conscious Practice Chapter 3 Race Chapter 4 Class Chapter 5 Sexual Orientation Chapter 6 Gender Chapter 7 Disability Part III Turning Planning Into Action Chapter 8 From Ally to Abolitionist Chapter 9 The Role of Failure in Identity Work Chapter 10 Tools for Extending Your Learning Chapter 11 From Practitioner to Facilitator Chapter 12 Beyond The Identity Conscious Educator Epilogue References and Resources Index      **One Nation, Two Realities** Morgan Marietta, David C. Barker, 2019-03-18 The deep divides that define politics in the United States are not restricted to policy or even cultural differences anymore Americans no longer agree on basic questions of fact Is climate change real Does racism still determine who gets ahead Is sexual orientation innate Do immigration and free trade help or hurt the economy Does gun control reduce violence Are false convictions common Employing several years of original survey data and experiments Marietta and Barker reach a number of enlightening and provocative conclusions dueling fact perceptions are not so much a product of hyper partisanship or media propaganda as they are of simple value differences and deepening distrust of authorities These duels foster social contempt even in the workplace and they warp the electorate The educated on both the right and the left carry the biggest guns and are the quickest to draw And finally fact checking and other proposed remedies don't seem to holster too many weapons they can even add bullets to the chamber Marietta and Barker's pessimistic conclusions will challenge idealistic reformers      **Philosophy and Ethics** Laura V. Siegal, 2006 In a world of seemingly never ending technological advances questions of ethics take on even more significance than in the past Conflicts of interest abound and pressure mounts at every turn for more profits higher incomes power and instant gratification leads to the temptation to ignore questions of ethics This book presents new and interesting research on ethical

issues in the modern day      *Persons, Animals, Ourselves* Paul F. Snowdon, 2014-10-09 The starting point for this book is a particular answer to a question that grips many of us what kind of thing are we The particular answer is that we are animals of a certain sort a view nowadays called animalism This answer will appear obvious to many but on the whole philosophers have rejected it Paul F Snowdon proposes contrary to that attitude that there are strong reasons to believe animalism and that when properly analysed the objections against it that philosophers have given are not convincing One way to put the idea is that we should not think of ourselves as things that need psychological states or capacities to exist any more than other animals do The initial chapters analyse the content and general philosophical implications of animalism including the so called problem of personal identity and that of the unity of consciousness and they provide a framework which categorises the standard philosophical objections Snowdon then argues that animalism is consistent with a perfectly plausible account of the central notion of a person and he criticises the accounts offered by John Locke and by David Wiggins of that notion In the two next chapters Snowdon argues that there are very strong reasons to think animalism is true and proposes some central claims about animal which are relevant to the argument In the rest of the book the task is to formulate and to persuade the reader of the lack of cogency of the standard philosophical objections including the conviction that it is possible for the animal that I would be if animalism were true to continue in existence after I have ceased to exist and the argument that it is possible for us to remain in existence even when the animal has ceased to exist In considering these types of objections the views of various philosophers including Nagel Shoemaker Johnston Wilkes and Olson are also explored Snowdon concludes that animalism represents a highly commonsensical and defensible way of thinking about ourselves and that its rejection by philosophers rests on the tendency when doing philosophy to mistake fantasy for reality      **Get Real:** Edward

Rommen, 2010-06-27 The Gospel is more than information about the death and resurrection of our Lord It is an invitation to enter by way of personal faith into a relationship with the person referenced by our propositions Our task as believers is to mediate saving communion with a personal being upon whose will our very existence is contingent It is precisely this personal aspect of our message the Gospel as Person that is in conflict with the late modern notions of the Self and social discourse Get Real On Evangelism in the Late Modern World describes how the late modern phenomena of existential anxiety social alienation and epistemic uncertainty have resulted in what some have called the loss of Self It also identifies ways in which that loss obstructs both the presentation of and the reception of the Gospel as Person Finally it shows how the Gospel as Person facilitates the recovery of the Self and social discourse and how that message can be effectively presented in the late modern context      **Science Fiction and Philosophy** Susan Schneider, 2009-05-26 A timely volume that uses science fiction as a springboard to meaningful philosophical discussions especially at points of contact between science fiction and new scientific developments Raises questions and examines timely themes concerning the nature of the mind time travel artificial intelligence neural enhancement free will the nature of persons transhumanism virtual reality and neuroethics

Draws on a broad range of books films and television series including The Matrix Star Trek Blade Runner Frankenstein Brave New World The Time Machine and Back to the Future Considers the classic philosophical puzzles that appeal to the general reader while also exploring new topics of interest to the more seasoned academic      *Consciousness and Cognition* Michael Thau,2002 Consciousness and Cognition will appeal to anyone interested in the nature of the mind The book is organized around three famous philosophical puzzles Spectrum Inversion Frege s Puzzle and Black and White Mary The discussion of Frege s Puzzle contains important insights about linguistic communication so anyone interested in the fundamental questions in philosophy of language will also find the book illuminating BOOK JACKET      **Dialogues on Values and Centers of Value** Thomas M.
