Ideology And Leadership:

Charisma and Factionalism in the Nazi Party Joseph Nyomarkay, 1967-07-17 Charisma and Factionalism in the Nazi Party was first published in 1967 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions Few aspects of the history of the German Nazi party have had as little scholarly attention as has the nature or pattern of the intraparty factionalism References to conflicts within the party may be found in most accounts dealing with the Nazi movement but this book presents the first systematic study of those conflicts and their significance to an understanding of Nazism Professor Nyomarkay bases his study on extensive research in which he had access to original source materials including diaries and memoirs of party leaders and documents from Nazi trials and party archives His study is concerned with the issues attitudes motivations and actions of the various factions His conclusions suggest new interpretations of such turning points in the history of Nazism as the Hanover and Bamberg conferences of 1925 and 1926 respectively the Strasser crisis of 1930 and the stormtrooper purge of 1934 The author examines the role of Hitler s charisma in the party and shows that this trait elevated Hitler above factional strife making him the object rather than the subject of rivalries The discussion of charisma points up the difference between the Nazi factionalism and that which has occurred in other totalitarian movements such as communism where authority rests on ideology rather than on charisma Through his study Professor Nyomarkay offers a new theory of the relationship between factional conflict and legitimacy of power presenting a hypothesis of possible typologies of factional behavior based on the nature and degree of group cohesion The book is important for students of political science and history and particularly for those interested in totalitarian movements and comparative political parties

King of the Mountain Arnold M. Ludwig,2013-07-24 People may choose to ignore their animal heritage by interpreting their behavior as divinely inspired socially purposeful or even self serving all of which they attribute to being human but they masticate fornicate and procreate much as chimps and apes do so they should have little cause to get upset if they learn that they act like other primates when they politically agitate debate abdicate placate and administrate too King of the Mountain presents the startling findings of Arnold M Ludwig s eighteen year investigation into why people want to rule The answer may seem obvious power privilege and perks but any adequate answer also needs to explain why so many rulers cling to power even when they are miserable trust nobody feel besieged and face almost certain death Ludwig s results suggest that leaders of nations tend to act remarkably like monkeys and apes in the way they come to power govern and rule Profiling every ruler of a recognized country in the twentieth century over 1 900 people in all Ludwig establishes how rulers came to power how they lost power the dangers they faced and the odds of their being assassinated committing suicide or dying a natural death Then concentrating on a smaller sub set of 377 rulers for whom more extensive personal information was available he compares six different kinds of leaders examining their characteristics their childhoods and their mental stability or instability to identify the main predictors of later political success Ludwig s penetrating observations though presented in a lighthearted and entertaining way offer important insight into why humans have engaged in war throughout recorded history as well as suggesting how they might live together in peace

Behemoth Franz Neumann, 2009-05-16 Franz Neumann's classic account of the governmental workings of Nazi Germany first published in 1942 is reprinted in a new paperback edition with an introduction by the distinguished historian Peter Hayes. Neumann was one of the only early Frankfurt School thinkers to examine seriously the problem of political institutions. After the rise of the Nazis to power, his emphasis shifted to an analysis of economic power, and then after the war to political psychology. But his contributions in *Behemoth* were groundbreaking: that the Nazi organization of society involved the collapse of traditional ideas of the state, of ideology, of law, and even of any underlying rationality. The book must be studied, not simply read. Raul Hilberg wrote:
