A Death in the Rainforest Don Kulick, 2019-06-18 Perhaps the finest and most profound account of ethnographic fieldwork and discovery that has ever entered the anthropological literature The Wall Street Journal If you want to experience a profoundly different culture without the exhausting travel to say nothing of the cost this is an excellent choice The Washington Post As a young anthropologist Don Kulick went to the tiny village of Gapun in New Guinea to document the death of the native language Tayap He arrived knowing that you can't study a language without understanding the daily lives of the people who speak it how they talk to their children how they argue how they gossip how they joke Over the course of thirty years he returned again and again to document Tayap before it disappeared entirely and he found himself inexorably drawn into their world and implicated in their destiny Kulick wanted to tell the story of Gapuners one that went beyond the particulars and uses of their language that took full stock of their vanishing culture This book takes us inside the village as he came to know it revealing what it is like to live in a difficult to get to village of two hundred people carved out like a cleft in the middle of a tropical rainforest But A Death in the Rainforest is also an illuminating look at the impact of Western culture on the farthest reaches of the globe and the story of why this anthropologist realized finally that he had to give up his study of this language and this village An engaging deeply perceptive and brilliant interrogation of what it means to study a culture A Death in the Rainforest takes readers into a world that endures in the face of massive changes one that is on the verge of disappearing forever

50 Simple Steps to Save the World's Rainforests Kim Henderson, The Green Patriot Working Group, 2012-03-12 Despite the very best conservation and environmental policy making efforts at least 80 000 acres of tropical rainforest disappear each day If action is not taken now experts estimate that the world's rainforests will mostly disappear within 50 years Currently the destruction of tropical forests is responsible for 17 percent of man made

carbon emissions more than what comes from all the world's cars, airplanes, and ships combined. Tropical rainforests need our help, and that's where *50 Simple Steps to Save the World's Rainforests* comes in. The future of the world's rainforests lies to a large extent in the collective hands of consumers and how they shop, since demand is what fuels the forces driving deforestation, agriculture, logging, and resource extraction. Through the 50-step journey, you will learn how, as a consumer, you may unwittingly support rainforest destruction and, more importantly, precisely how you can make different choices that help save rainforests. For example, you will learn how your paper use and purchases of rayon clothing affect Indonesian rainforests where Sumatran tigers are critically endangered, or how simply eating Brazil nuts helps save the Amazon rainforest. You will discover how the cultivation of palm oil, a common ingredient in confections, baked goods, soaps, and biofuels, is fueling rampant deforestation in Malaysia, Indonesia, and Papua New Guinea, and how you can avoid it.

50 Simple Steps to Save the Rainforests is the ultimate primer for anyone wanting to take action to help save this ecosystem, which is so critical to the future of mankind.

The Rise of the Hispanic Market in the United States Louis E. V. Nevaer, 2015-06-03

Not only are Hispanics the largest minority group in the United States, but Mexico is fast becoming our major trading partner, surpassing even Japan. In fact, the U.S. now has the fourth largest Spanish-speaking population in the world, after Mexico, Spain, and Argentina. How has this demographic group transformed the U.S. into a bilingual nation within the span of a generation? Why do Hispanics resist assimilation and insist on speaking Spanish in public life? And how can businesses effectively reach the emerging Hispanic consumer market with its estimated purchasing power of USD1 trillion by 2010? These questions constitute the single most important marketing challenge for corporate America in the twenty-first century. This book examines the Hispanic worldview and how it informs people's economic decisions, both in the United States and across North America. It challenges the viewpoint that American culture will soon dominate its NAFTA trading partners, looks carefully at the market for Hispanic goods in the U.S. and the market for our goods throughout the Spanish-speaking world, and shows how marketers are now reaching the Hispanic community domestically. The information and insights found here are essential for teachers, students, and professionals in the fields of international finance and world trade, as well as almost all areas of business, marketing, and strategic planning.
