historical figures who by their words and or deeds set the stage for political thought before the constitution was written All the subjects of this book deal as best they can with questions of the relationship between executive and other branches of government all deal with the role of religion in government all deal with how much if any democracy should be allowed in determining fundamental law and day to day governance all engaged in the thought experiment of asking what life was like before government and therefore why government was instituted all deal with the relationship of central authority and provincial states rights all seek to avoid tyranny Commentary on the Constitution from Plato to Rousseau is not about what the founders took from previous thinkers and political figures it is a book that allows the reader to consider the U S Constitution while learning about people whose genius has transcended time from Plato to Rousseau
