Illuminating Letters Paul C. Gutfahr, Megan L. Benton, 2001 What do we read when we read a text The author s words of course but is that all The prevailing publishing ethic has insisted that typography the selection and arrangement of type and other visual elements on a page should be an invisible silent and deferential servant to the text it conveys This book contests that conventional point of view Looking at texts ranging from the King James Bible to contemporary comic strips the contributors to Illuminating Letters examine the seldom considered but richly revealing relationships between a text s typography and its literary interpretation The essays assume no previous typographic knowledge or expertise instead they invite readers primarily concerned with literary and cultural meanings to turn a more curious eye to the visual and physical forms of a specific text or genre As the contributors show closer inspection of those forms can yield fresh insights into the significance of a text s material presentation leading readers to appreciate better how presentation shapes understandings of the text s meanings and values The case studies included in the volume amplify its two overarching themes one set explores the roles of printers and publishers in manipulating willingly or not the meaning and reception of texts through typographic choices the other group examines the efforts of authors to circumvent or subvert such mediation by directly controlling the typographic presentation of their texts Together these essays demonstrate that choices about type selection and arrangement do indeed help to orchestrate textual meaning In addition to the editors contributors include Sarah A Kelen Beth McCoy Steven R Price Leon Jackson and Gene Kannenberg Jr Advances in Design and Digital Communication III Nuno Martins, Daniel Brandão, 2022-10-26 This book reports on research findings and practical lessons featuring advances in the areas of digital and interaction design graphic design and branding design education society and communication in design practice and related ones Gathering the proceedings of the 6th International Conference on Digital Design and Communication Digicom 2022 held on November 3 5 2022 as an hybrid event from Barcelos Portugal and continuing the tradition of the previous book it describes new design strategies and solutions to foster digital communication within and between the society institutions and brands By highlighting innovative ideas and reporting on multidisciplinary projects it offers a source of inspiration for designers of all kinds including graphic and web designers UI UX and social media designers and to researchers advertisers artists and brand and corporate communication managers alike Typography for Desktop Publishers Grant Shipcott, 1994 The development of computer typesetting has provided the graphic designer with an unparalleled choice of typefaces and typographical solutions The challenge today is to make sense of the alternatives offered and generate typography that is attractive legible and appropriate to the task at hand **Mastering Type** Denise Bosler, 2024-12-26 By breaking down the study of type into a systematic progression of relationships letter word sentence paragraph page and screen award winning graphic designer and professor of communication design Denise Bosler provides a unique and illuminating perspective on typography for both print and digital media and for designers of all skill levels New to
