Missler, 2023-01-19 Are there more than four dimensions to physical reality Is it possible to traverse time as well as space Is there a reality beyond our traditional concepts of time and space The startling discovery of modern science is that our physical universe is actually finite Scientists now acknowledge that the universe had a beginning They call the singularity from which it all began the Big Bang While the detail among the many variants of these theories remain quite controversial the fact that there was a definite beginning has gained widespread agreement This is of course what the Bible has maintained throughout its 66 books **Beyond Human** W. R. Hagen, 2016-07-15 Few if any have heard this story and with good reason This is not a tale about the future but a chronicle of hushed up events in the recent past The events and dates herein are accurately documented but the names of certain participants and the true locations of events have been changed to protect the quick and the dead along with national security Details of Part I of this chronicle were provided first hand to your reporter by two humans a man and a woman who played key roles in this astounding account I am sworn to secrecy regarding their names but I am allowed to report that the woman was at one time a respected federal intelligence agent and the man is the respected CEO of an international company I am not allowed to even hint at who provided details of Part II Suffice it to say if anyone could know those details he is the man I personally met with during his brief return to Riverside California in 2007 I can only guess from where he arrived and to where he returned *Beyond Einstein* Lenard

Metzger, 2008-03-01 The author points out what he considers to be some erroneous assumptions in Einstein's theories of

relativity This allowed going beyond these theories in the development of a non relativistic unified theory of gravitation and electromagnetism What causes gravity and establishes the speed of light is described The possibility of faster than light travel is discussed Included are new ideas about the structure of atoms the emission of photons and the interaction of gravity with atoms and photons Also presented is the part played by gravity in the formation of black holes the Big Bang the expanding Universe and dark matter A structure of the Cosmos is described that could lead to future Big Bangs Beyond Obsolete Chris Edwards,2018-12-21 Americans have seen it all in education over the last twenty years charter schools vouchers private schools ever changing sets of technology increased funding for schools decreased funding for schools accountability measures for teachers and on and on These schemes never seem to make any real changes in student outcomes This is because the obsolete educational system is simply not compatible with what we now know about how students learn and how teachers are developed and sustained Beyond Obsolete How to Upgrade Classroom Practice and School Structure delves into the history of Western Civilization shows how a misunderstanding of this history informs our current educational system and then makes a broad argument for a full scale upgrade in teacher practice the software and school structure the hardware If educational reform is to be achieved then superintendents assistant superintendents principals assistant principals etc will have to be declared obsolete Education will have to move beyond them into a new era where teachers are the educational leaders in their field and their classroom practice is compatible with learning theory

*Beyond the Universe* , **Beyond Perception** Chuck Missler,2023-01-19 Why do scientists now believe we live in a 10 dimensional universe Has physics finally reached the very boundaries of reality There seems to be evidence to suggest that our world and everything in it are only ghostly images projections from a level of reality so beyond our own that the real reality is literally beyond both space and time The main architect of this astonishing idea is one of the world s most eminent thinkers physicist David Bohm a protege of Einstein s Earlier he noticed that in plasmas particles stopped behaving like individuals and started behaving as if they were part of a larger and inter connected whole He continued his work in the behavior of oceans of these particles noting their behaving as if they know what each on the untold trillions of individual particles were doing **Beyond Ethics to Post-Ethics** Peter Baofu,2011-02-01 Is moral goodness really so desirable in the way that its proponents through the ages would like us to believe For instance in our time there is even this latest version of the popular moral idea shared by many when Dalai Lama suggested that we need these human values of compassion and affection Even without religion we have the capacity to promote these things WK 2009 The naivety of this popular moral idea can be contrasted with an opposing critical idea advocated not long ago by Sigmund Freud 1966 who once wrote that men are not gentle creatures who want to be loved and who at the most can defend themselves if they are attacked they are on the contrary creatures among whose instinctual endowments is to be reckoned a powerful share of aggressiveness As a result their neighbor is for them someone who tempts them to satisfy their aggressiveness on him to exploit his capacity for work

without compensation to use him sexually without his consent to seize his possessions to humiliate him to cause him pain to torture and to kill him Homo homini lupus Contrary to the two opposing sides of this battle for the high moral ground morality and immorality are neither possible nor desirable to the extent that their respective ideologues would like us to believe But one should not misunderstand this challenge as a suggestion that ethics is a worthless field of study or that other fields of study related to ethics like political philosophy moral psychology social studies theology or even international relations should be dismissed Needless to stress neither of these two extreme views is reasonable either Instead this book provides an alternative better way to understand the nature of ethics especially in relation to morality and immorality while learning from different approaches in the literature but without favoring any one of them nor integrating them since they are not necessarily compatible with each other This book offers a new theory to transcend the existing approaches in the literature on ethics in a way not thought of before This seminal project is to fundamentally alter the way that we think about ethics from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what I originally called its post human fate *Beyond Cutting Edge with Bob Lazar* Alexandre

Kassiantchouk, 2022-01-27 After Big Bang Dark Matter Dark Energy and Universe expansion debunking in my book Time Matters from 2021 I asked myself How hard could it be to validate Bob Lazar s story So I started with the frozen candle episode because it was about time dilation and I am good at it And besides this episode on the surface contradicted with my own experience described in chapter 12 But all new physics has checked out The same result was with another episode and another Now I agree with Dr Edgar Mitchell Apollo 14 Astronaut who said about Bob Lazar His basic story is true that he was too exposed to what he thought were alien craft and attempts to engineer and back engineer it I think that his explanation of what s going on and his theory that he s utilizing is probably not on target In plain English Bob described real events but he used wrong theory when trying to explain the observations But now we have the right theory this book starts with it though you can skip it except for chapter 1 which is must read and it checks out with Bob Lazar s anecdotes Reading this book does not require advanced knowledge of physics A teenager with the help of a science teacher or with the help of the Internet can understand it Understanding reflection and refraction would be enough to start with **The Lost Fleet: Beyond the**

**Frontier: Leviathan** Jack Campbell, 2016-04-26 Includes an excerpt from The lost stars Shattered spear **Beyond Cutting Edge with Bob Lazar, 3rd edition** Alexandre Kassiantchouk, After Big Bang Dark Matter Dark Energy and Universe expansion debunking in my book Time Matters from 2021 I asked myself How hard could it be to validate Bob Lazar s story So I started with the frozen candle episode because it was about time dilation and because this episode on the surface contradicted my own experience described in chapter 12 But all new physics has checked out The same result was with another episode and another Now I agree with Dr Edgar Mitchell Apollo 14 Astronaut who said about Bob Lazar His basic story is true that he was too exposed to what he thought were alien craft and attempts to engineer and back engineer it I

think that his explanation of what's going on and his theory that he's utilizing is probably not on target. In plain English, Bob described real events but he used wrong theory when trying to explain the observations. But now we have the right theory. This book starts with it though you can skip it except for chapter 1 which is must read and it checks out with Bob Lazar's anecdotes. *Beyond Cutting Edge with Bob Lazar : 2nd edition* Alexandre Kassiantchouk, After Big Bang Dark Matter Dark Energy and Universe expansion debunking in my book Time Matters from 2021. I asked myself How hard could it be to validate Bob Lazar's story. So I started with the frozen candle episode because it was about time dilation and I am good at it. And besides this episode on the surface contradicted with my own experience described in chapter 12. But all new physics has checked out. The same result was with another episode and another. Now I agree with Dr Edgar Mitchell Apollo 14 Astronaut who said about Bob Lazar. His basic story is true that he was too exposed to what he thought were alien craft and attempts to engineer and back engineer it. I think that his explanation of what's going on and his theory that he's utilizing is probably not on target. In plain English, Bob described real events but he used wrong theory when trying to explain the observations. But now we have the right theory. This book starts with it though you can skip it except for chapter 1 which is must read and it checks out with Bob Lazar's anecdotes. Reading this book does not require advanced knowledge of physics. A teenager with the help of a science teacher or with the help of the Internet can understand it. Understanding reflection and refraction would be enough to start with. This book can be read two ways. Chapter by chapter but that might be boring to you. Better try another way. Read chapter 1 to get a grasp on time dilation, redshift and refraction. Then jump to chapter 13 and continue reading there sometimes going back to earlier chapters when they are referenced. Engineers check chapter 30 first like a fridge once impossible. Bob Lazar's craft becomes possible. Everybody else check chapter 39 first it gives a general impression on how physics solves Bob Lazar's story. *Lost Fleet: Beyond the Frontier: Invincible* Jack Campbell, 2012-05-01. Admiral John Black Jack Geary was revived from cryogenic sleep to lead the Alliance against the Syndicate Worlds. But his superiors question his loyalty to the regime. Now in command of the First Fleet he is tasked with exploring the frontier beyond Syndic space. A mission he fears deliberately puts the fleet and himself in harm's way. An encounter with the alien enigmas confirms Geary's fears. Attacked without warning he orders the fleet to jump star systems only to enter the crosshairs of another hostile alien armada. Ignoring the First Fleet's peaceful communications this species sends its ships into battle while it guards the exiting jump point with a fortress of incalculable power. Now Geary must find a way to reach the jump point without massive casualties even though the enigmas could be waiting on the other side.
