

# Lighter Than Air

**S Nieto**

## Lighter Than Air:

*Flight* Jennifer Lawson, 2001 The 12 lessons in this module introduce students to Bernoulli's principle and the forces affecting flight. Students examine and compare aircraft and spacecraft through a study of the history of flight and design, construct and test their own flying devices. Also included are materials lists, activity descriptions, questioning techniques, activity centre and extension ideas, assessment suggestions, activity sheets and visuals. The module offers a detailed introduction to the Hands On Science program, guiding principles, implementation guidelines, an overview of the skills that young students use and develop during scientific inquiry, a list of children's books and websites related to the science topics introduced, and a classroom assessment plan with record keeping templates. Lighter Than Air David Owen, 1999

There has always been a sense of romanticism attached to balloons as they glide effortlessly and soundlessly in a world of their own. However, the history of balloon flight is often underestimated, as are the fascinating scientific breakthroughs that can be attributed to it.
