Thomas Schelling and the Nuclear Age Robert Ayson, 2020-09-23

An illuminating insight into the work of Thomas Schelling one of the most influential strategic thinkers of the nuclear age By the time of the Cuban Missile Crisis and the United States early forays into Vietnam he had become one of the most distinctive voices in Western strategy This book shows how Schelling s thinking is much more than a reaction to the tensions of the Cold War In a demonstration that ideas can be just as significant as superpower politics Robert Ayson traces the way this Harvard University professor built a unique intellectual framework using a mix of social scientific reasoning from economics to social

theory and psychology As such this volume offers a rare glimpse into the intellectual history which underpins classical thinking on nuclear strategy and arms control thinking which still has an enormous influence in the early twenty first century

Conventional Warfare in the Nuclear Age Otto Heilbrunn, 2021-01-26 This book first published in 1965 examines the doctrine for fighting a conventional war against a nuclear power Troops must be deployed as if they were fighting a nuclear war dispersed over a greatly extended battlefield conducting mobile operations with no fixed front line or static defence system or defence zone A new strategy of forward defence is needed whereby significant numbers of troops are dispatched into the enemy's rear and this book lays out such a strategy and thereby sets a proposal for the future safety of Western Europe

Makers of Modern Strategy from Machiavelli to the Nuclear Age Peter Paret, Gordon A. Craig, Felix Gilbert, 2010-10-01 Authoritative and convincing New York Times Book Review The classic reference on the theory and practice of war The essays in this volume analyze war its strategic characteristics and its political and social functions over the past five centuries The diversity of its themes and the broad perspectives applied to them make the book a work of general history as much as a history of the theory and practice of war from the Renaissance to the present *Makers of Modern Strategy from Machiavelli to the Nuclear Age* takes the first part of its title from an earlier collection of essays that became a classic of historical scholarship Three essays are reprinted from the earlier book while four others have been extensively revised The rest twenty two essays are new The subjects addressed range from major theorists and political and military leaders to impersonal forces Machiavelli Clausewitz and Marx and Engels are discussed as are Napoleon Churchill and Mao Other essays trace the interaction of theory and experience over generations the evolution of American strategy for instance or the emergence of revolutionary war in the modern world Still others analyze the strategy of particular conflicts the First and Second World Wars or the relationship between technology policy and war in the nuclear age Whatever its theme each essay places the specifics of military thought and action in their political social and economic environment Together the contributors have produced a book that reinterprets and illuminates war one of the most powerful forces in history and one that cannot be controlled in the future without an understanding of its past

On the Utility of War in the Nuclear Age Andrew Peter Rasiulis, 1981

Defence and the Media in Time of Limited War Peter R Young, 2013-09-13 First Published in 2004 Events in the Gulf Crisis of 1990-91 have highlighted the importance of the increasingly complex and difficult relations between Defence and the Media in time of War especially in time of limited conflict when the well being let alone the security of the home nation may not be affected This problem has become especially acute given the growth of the new high technology media and its global spread and immediacy The question of how to reconcile the competing demands for secrecy on the one hand and the public's right to know on the other is fast emerging as a major question of our times In Brisbane during 3-5 April 1991 there was held what is believed to be the first ever International Conference on the topic of Defence and the Media in Time of Limited Conflict to look at this and other issues stemming from the problem Jointly funded

by the Queensland University of Technology and the Australian Department of Defence the three day Conference was a major success attracting 160 delegates from Great Britain the United States Zambia Papua New Guinea Brunei New Zealand France Indonesia and of course Australia This volume publishes nearly all the papers delivered at this conference whose main focus was on post 1945 limited wars especially Vietnam Northern Ireland the Falklands Grenada and the Gulf all of which receive detailed analysis

Bibliography on Limited War Army Library (U.S.),1958 *Henry Kissinger and the American Approach to Foreign Policy* Gregory D. Cleva,1989 This analysis of Henry Kissinger's historical philosophy statecraft and views on international politics reveals Kissinger to be a transitional figure who urged a conversion of American foreign policy from an insular to a continental approach

Limited War Revisited Robert E. Osgood,2019-03-08 The strategy of limited war has transformed the American approach to the use of force and played a key role in U S foreign policy since World War II As the mainstay of containment it was designed to deter and fight wars effectively at a tolerable cost and risk in the nuclear age by providing the United States with a flexible and controlled response to a variety of military threats The strategy met a severe challenge in the Vietnam war it has nevertheless continued to prevail as a doctrine if not necessarily with its former utility by adapting to the changing domestic and international environment after Vietnam Robert E Osgood critically examines the success ambiguities and flaws of the strategy in its expanding application to postwar military policy He interprets its impact on the Vietnam war and vice versa extends his analysis to the new challenges posed by changes in technology and the military balance that affect U S security and concludes with a searching inquiry into the problems of limited war where its utility as an instrument of foreign policy is now most in doubt the Third World

The Christian Faith and War in the Nuclear Age Methodist Church (U.S.). Commission to Study the Christian Faith and War in the Nuclear Age,1963

Professional Journal of the United States Army ,1979 *Success and Failure in Limited War* Spencer D. Bakich,2014-03-20 Common and destructive limited wars are significant international events that pose a number of challenges to the states involved beyond simple victory or defeat Chief among these challenges is the risk of escalation be it in the scale scope cost or duration of the conflict In this book Spencer D Bakich investigates a crucial and heretofore ignored factor in determining the nature and direction of limited war information institutions Traditional assessments of wartime strategy focus on the relationship between the military and civilians but Bakich argues that we must take into account the information flow patterns among top policy makers and all national security organizations By examining the fate of American military and diplomatic strategy in four limited wars Bakich demonstrates how not only the availability and quality of information but also the ways in which information is gathered managed analyzed and used shape a state's ability to wield power effectively in dynamic and complex international systems Utilizing a range of primary and secondary source materials *Success and Failure in Limited War* makes a timely case for the power of information in war with crucial implications for international relations theory and statecraft

On the Uses of Military Power in the Nuclear Age Klaus

Eugen Knorr, 2015-12-08 Professor Knorr examines trends in the values which nations derive in their international relationships from the possession and use of both nuclear and non nuclear military forces and suggests that territorial conquest and the furtherance of economic benefits by military means have generally diminished in appeal. He inquires into the costs and disadvantages of military power, the greatly reduced security obtainable even by the major nuclear powers and the noticeable diminution in the legitimacy of international violence in its several forms.
