Limiting The Spread Of Weapon Usable Fissile Materials:

Limiting the Spread of Weapon-usable Fissile Materials Brian G. Chow, Kenneth A. Solomon, 1993 This report examines the problem of rapidly accumulating weapon usable fissile materials and proposes an agenda to help the United States and other countries manage these materials Weapon usable fissile materials come from both dismantled nuclear weapons and the spent fuel from civilian nuclear power plants This report should be of interest to nuclear nonproliferation planners and analysts in the United States the former Soviet republics FSRs and other countries and also to nuclear energy planners The study started in October 1991 By June 1992 we had briefed our interim recommendations to planners and analysts in various DoD offices and also in the National Security Council Livermore National Laboratory and the nuclear industry We also solicited reactions from public interest groups particularly on the ramifications of our key recommendation that the United States purchase highly enriched uranium from the FSRs after it is diluted and also their weapon grade plutonium The present report incorporates the latest data on nuclear weapon dismantling and elaborates on the proposed agenda but its basic recommendations differ little from the interim proposals Storage and Disposition of Weapons-usable Fissile Materials , 1996 **Hearings on National Defense Authorization Act for Fiscal Year 1995--S. 2182 (H.R. 4301) and Oversight of Previously Authorized Programs Before the Committee on Armed Services, House of Representatives, One Hundred Third Congress, Second Session** United States. Congress. House. Committee on Armed Services. Military Application of Nuclear Energy Panel, 1994 **Stemming the Plutonium Tide** United States. Congress. House. Committee on Foreign Affairs. Subcommittee on International Security, International Organizations, and Human Rights, 1994 *Regaining Security* William J. Weida, 2019-07-09 First published in 1997 this volume observes that of all the materials systems and facilities that designed and operated nuclear weapons the most readily available assets for reuse are often identified as the highly enriched uranium HEU and plutonium from warheads However proliferation concerns the reuse of much of this material unlikely This book explores the economic issues surrounding the major expenditures facing the US as it attempts to dispose of weapon grade nuclear materials in a proliferation resistant manner The book discusses the economic values of plutonium and HEU the economic nature of the nuclear industry reprocessing and operations costs the economics of burning plutonium to generate electrical power the economics of down blending and burning HEU military conversion as a rationale for selecting plutonium disposition options the economics of transmutation and the economics of other proposals ranging from monitored surface storage to vitrification The book concludes by identifying the major cost drivers affecting all disposition options **Technology for Global Economic and Environmental Survival and Prosperity** Behram N. Kursunogamallu, Stephan L. Mintz, Arnold Perlmutter, 2012-12-06 The 1996 Conference focused on topics of environmentally attractive technologies for electricity production renewables natural gas and nuclear energy Recent technology developments were addressed which include creation of more efficient photovoltaic converters for electricity

generation the current and future role of natural gas in meeting global demand for electric power generation and the status of nuclear energy its various applications and the prospects for its future The Conference agenda in light of its global economic impact included comparative discussions of all the above alternative energy sources The regional choice of energy sources and their impact on the global economy and environment was reviewed In addition to the above subjects but strongly connected with the theme of global energy needs and security the Conference program contained one session on new needs and directions in higher education new curricula to cover fundamental global issues on energy resources and environment

Disposition of Surplus Highly Enriched Uranium [TN,SC,VA] ,1996 Weapons Proliferation and World Order

Brad Roberts,2023-09-29 With the end of the Cold War the subject of weapons proliferation has acquired new interest and prominence So too have questions about the nature of the world order that will succeed the structure of the last fifty years This study explores the connections among these topics It describes the prevailing conceptual model of nuclear proliferation evaluates proliferation's changing technical features considers economic and political factors bearing on its future rate and character and speculates about proliferation's implications on the post cold war world order It also considers the role of international public policy in meeting proliferation's challenges Arguing that updated approaches are needed the analysis emphasizes cooperative over coercive approaches to order It concludes with an assessment of progress to date in meeting these new challenges arguing that the new agenda is only slowly coming into focus **Just War on Terror?** Brian

Wicker,2016-04-22 Following the 9 11 attacks by Al Qaeda President Bush declared war on terror In the succeeding years Western governments have struggled to find the right way to respond to the new and deadly threat posed by terrorism With the election of President Obama the rhetoric has softened and policies have been adjusted but the underlying problems and challenges remain the same Meanwhile the war on terrorism in Afghanistan has been intensified Drawing on just war teaching as developed within both Christian and Muslim traditions this book examines whether and how liberal democracies can combat the new global terrorism both effectively and justly The authors including distinguished academics from both sides of the Atlantic Christian and Muslim theologians former senior civil servants and a General deploy a wide range of experience and expertise to address one of the most difficult and pressing ethical challenges to contemporary society

U.S.-EURATOM Agreement for Peaceful Nuclear Cooperation United States. Congress. Senate. Committee on Governmental Affairs,1996 Reviewing the Nuclear Nonproliferation Treaty (NPT) Henry D. Sokolski,Army War College (U.S.). Strategic Studies Institute,2010 As currently interpreted it is difficult to see why the Nuclear Nonproliferation Treaty NPT warrants much support as a nonproliferation convention Most foreign ministries including that of Iran and the United States insist that Article IV of the NPT recognizes the inalienable right of all states to develop peaceful nuclear energy This includes money losing activities such as nuclear fuel reprocessing which can bring countries to the very brink of acquiring nuclear weapons If the NPT is intended to ensure that states share peaceful benefits of nuclear energy and to prevent the

spread of nuclear bomb making technologies it is difficult to see how it can accomplish either if the interpretation identified above is correct Some argue however that the NPT clearly proscribes proliferation by requiring international nuclear safeguards against military diversions of fissile material Unfortunately these procedures which are required of all non nuclear weapons state members of the NPT under Article III are rickety at best Each chapter of this book is dedicated to clarifying the NPT s key ambiguities and the chapters are roughly structured to trace the NPT s text article by article The analysis set forth here was mostly written or commissioned by the Nonproliferation Policy Education Center Much more of course could have been included in this book But rather than seeking to be comprehensive the aim throughout is to provide a guide for both policymakers and security analysts This guide should assist in navigating the most important debates over how best to read and implement the NPT and in the process spotlighting alternative views of the NPT that are sound and supportable

Nuclear Power and the Spread of Nuclear Weapons Steven Dolley, Sharon Tanzer, Paul Leventhal, 2011-07 In the wake of California s energy crisis policymakers rush to satisfy growing demand requirements may run the risk of naively ignoring the larger issues and dangers associated with increased reliance on nuclear power A connection between national nuclear power programs and nuclear proliferation can be found in the strategic initiatives of North Korea Iraq Iran India and Pakistan In response to this threat the Nuclear Control Institute has assembled a consortium of experts to underscore the connection that exists between nuclear power and the proliferation of nuclear weapons They evaluated proliferation risks and proposed viable alternative energy sources This volume includes the analysis of such respected thinkers as Pulitzer Prize winning author Richard Rhodes Rep Edward Markey D Mass Amory Lovins CEO of the Rocky Mountain Institute and Amb Robert Galucci dean of the Georgetown University School of Foreign Service

The Proposed Fissile-material Production Cutoff Brian G. Chow, Richard Speier, Gregory S. Jones, 1995 President Clinton has announced that the United States will take a comprehensive approach to the growing global accumulation of fissile material As an element to that approach he proposed a multilateral convention banning production of such material for nuclear explosives purposes or outside international safeguards This report examines and proposes some next steps to the proposed convention to further strengthen worldwide control of weapon usable material
